### WANTED-A LAND CLEARING SCHEME

Now that the railway has opened up the Skeena district to the settler, an excellent chance is given the Provincial Government to evolve some land clearing scheme on a large scale, to bring the lands into early settlement.

It is estimated that it will cost the settler \$100 an acre to clear Indian Head, June 20.—In a who have worked to arrange the the land by such means as are now possible to him. With the great head-on collision between two C. orchestra. areas that are now opened up, it would be possible for the Government P. R. freight trains at Winro to put large gangs of men at work, properly equipped with the best today Engineer Pratt was killed NEW DOMINION machinery and methods, to clear the land by the most economical and Brakeman Bradley had bis means. The lumber thus removed might be sawn, and from it a suffi- back broken. cient revenue be obtained to pay for the work of clearing. With a large variety of ways in which the work could be financed, so as to fall TOOK HIS LIFE easily on the resources of the settlers, statesmanship should not find any great difficulties in arranging the details of a land clearing scheme.

In the State of Washington where conditions are somewhat similar to British Columbia a movement is on foot to induce the James Bratt of Vancouver Comgovernment to take up this matter of land clearing, using the best attainable system, the cost of the process being made a charge upon the land, but repayable over a period of from ten to twenty years at a reasonable rate of tinterest. It is estimated that if this were done the country would be put forward at least twenty-five years in the matter of development.

It is pointed out by those who favor this scheme that the work had recently experienced, James general improvement of the exif undertaken by the government on an extensive scale, could be Bratt of Vancouver, committed isting laws and regulations. It done at a much cheaper rate than could be the case where only a suicide this morning at his home has been largely drafted by Mr. F. small amount of clearing is required. This clearing would not only in Kitsilano. He had swallowed a T. Congdon, M. P. for the Yukon, be a great advantage to the particular district where the operations large quantity of poison, and was are carried on, but would be an object lesson for the whole country; beyond help when deiscovered. and as exact accounts of the expense would be kept the figures would be very instructive.

In the United States large sums of government money have been used for reclaiming arid lands with very good results. Here in Sir Daniel McMillan May Be- Departments of the various Pro-British Columbia there are hundreds of thousands of acres of lands which might be cleared of timber or stumps and which would make splendid farms. Large areas of British Columbia lands are useful for little except fruit farms, but all are more or less productive. These should all in some way be brought under cultivation.
