Where daily newspapers are published there is a yearly per capita buying power of \$503—almost double the national average, which is \$274. The census shows that sales, as made in daily newspaper cities, are as follow:— 76.71 per cent. of clothing and apparel. 37.30 per cent. of drugs and toiletries. 64.35 per cent. of food. 60.84 per cent. of automotive sales. 58.50 per cent. of general merchandise.

These daily newspaper markets are outstanding, and the roads to them are clearly marked. The local newspapers, metropolitan or provincial, give daily and intimate access to the homes where this buying power is massed.

Does your selling plan need the concentration of special sales effort on specially desirable territories? Are you trying to acquire the widespread support of dealer and consumer goodwill? Do you need speed, coverage and control with economy of expenditure?
