INCREASED TAXES

Last week the provincial minister of finance announced that the taxes would be increased. Yesterday the federal minister announced that the little sum of seventy million dollars more than the previous year would be extracted from the pockets of the ten million people who inhabit this country. It means seven dollars each for every man, woman and child in the country and the people with children will pay more than their share because the children consume as much sugar and other taxable commodities as grownups. In a family of six the tax would be approximately \$42 a year more than formerly.

To levy that much extra taxes when the average earning power of every community has dropped ten to fifty

percent is a terrible blow.

The hardest tax is that upon investors in companies, and it is probable that in many cases companies will be dissolved and a return be made to private control. Incorporated companies have to pay twelve and a half percent on the income earned and if there is a dividend the shareholders have to pay again on the same money from three percent up, according to the amount of their income.

HARDSHIPS ON FAMILIES

Is it any wonder that people refuse to have families. Doctors' fees for mothers are so high that it is impossible for many to pay in these difficult times. Living costs are being increased through taxes levied upon food. Hospital this invention, "The Repulsion providing the bridge stays up, Mayor fees are high. Now it is being proposed in some quarters to do away with what are known as social services, which are in many cases services designed to assist those who raise families.

TAX ON SUGAR

The most recent levy of the government announced yesterday is one that will hit every famiy.
