

Every News reader is urged to heed these precautions

The flu epidemic has reached this community. The health authorities are doing their part, but every individual must be on guard.

Keep the family medicine chest supplied with the sensible aids to health; any sickness weakens the system and lowers your resistance to germs.

Every household should have at least one hot water bag, in good condition, or an electric pad; and a fever thermometer. Sleep in airy rooms, with ample covering. Avoid an overheated house during the day; dress warmly when you go out. Beware of over-crowded cars, poorly ventilated public meeting places, stuffy telephone booths. Flu is con-

tagious! Breathe through the nose. Keep the system alkaline, the bowels in good order; Phillips' Milk of Magnesia will help you do both. If you have any symptom of a cold, take some Aspirin according to directions. Don't lose even five minutes! Genuine Aspirin tablets can't harm you, but a common cold is dangerous at a time like this.

Eat plain foods, get enough rest, and don't over-do. Take these extra precautions to keep in sound physical condition, so your system will have normal resistance against germs.

At any sign of actual flu, call a doctor at once. Do not try to treat yourself for influenza!
