COPPER IS PILING UP

Granby Co. Now Has 25,000,000 Pounds Lying on Dock at

ANYOX, April 18:-The Granby Company now has here 25,000,000 pounds of copper valued at about \$1,250,090 piled in a heap near the dock ready for shipment as soon as the price reaches a point where it can be shipped without causing the company loss. The difficulty is that the interest on the money is eating up prospective profits.

Company officials say they have between fifty and sixty million pounds stored in the east.

Asked as to the progress being made, officials of the company stated that they had now practically all the men they wanted but so far the efficiency is only about eighty percent. However, the new men are gradually improving and every day sees the production increased.

AIR MAIL TO ORIENT

Jack McCord, Well Known Aviation Enthusiast, Predicts New Service

SEATTLE, April 18:-A fast air mail route between Scattle and the Orient via Alaska and the Aleutians will be in operation within two years, it is predicted by Jack McCord, prominent Western Alaska cattle man and trader, who is a visitor in Seattle, accompanied by his pretty auburnhaired wife. Cutting ten days off the fastest present steamship time, planes will be able to make the trip from here to the Orient in two days on continuous flights and in four days by stopping at nights, McCord declares.

Japanese Planes Overcome Difficulties Scientist Foresees Day When All Fish Will be Sent in Frozen State

D. B. Finn Forecasts That Eventually No Fresh Halibut Will be consigned From Here to Eastern Markets— Tells of Experimental Work in Refrigeration

"I think the day is coming when no fresh halibut will be shipped to the eastern markets from Prince Rupert. I think it will all be frozen by improved methods and shipped in a less costly way than is at present done to the eastern markets where it will arrive in a better condition than supposedly fresh halibut has ever arrived. I am not alone in possessing these thoughts. Some#

of the most thoughtful men in Canada are inclined to agree with me
BRITISHER will bring with it many vexing problems, I am sure that they are all soluble."

Such was an interesting prediction which was made at today's luncheon of the Prince Rupert Gyro Club by D. B. Finn, director of the Prince Rupert Fisheries Experimental Station, in an address on the subject of "Refrigeration" in the course of which he described interesting experiments in this field of the fishing industry which are be-

ing carried on at the local station. "The one cry of nearly every great industrialist that I have ever heard of is 'Look to the Future.' The Henry Fords, the Monds, the Carnegies and the Rockefellers have all been men who, while they took advantage of present conditions, at the same time so handled their businesses that they could take advantage of what they felt must happen in the future. Macdonald Admits Espionage and Sabotage at Moscow-Others Declare Their Innocence

MOSCOW, April 18:-Just before the court retired today to consider the verdict in the Metropolitan-Vickers sabotage case, William L. Macdonald reiterated his guilt but all the other British prisoners stoutly affirmed their innocence and all the Russian defendants abjectly threw themselves on the mercy of the court. The Russians admitted all the charges against them.

Yesterday the attorney for Macdonald admitted that his client had been guilty of espionage and
