Already there has been an advance in mining stocks but it is predicted that they will go much higher yet.

Doubtless there will be an advance in price of many industrials as well as gold stocks in the near future. Invest- dral Hall. The eyening was spent ment experts are advising people to buy but there is still a good deal of timidity on the part of investors.

It seems very likely that any good income-bearing stocks will show a marked advance in the next few months but not many people in the north have money to invest just now. That is why investment opportunities do not interest them much.
