#### NATIONAL POET

Bobbie Burns is the Scottish national poet but he is more than that. He has become a national institution, part and taking place in searching for and parcel of Scottish life, influencing the whole trend of the people who live or whose ancestors lived north of the Tweed. It is probable that no other country in the world is an increase of 25 percent. The has so adopted a poet as its national hero, who annually hold high festivities in his honor and who religiously study his verses, eulogizing the best and apologizing for the worst.

#### IRISH SITUATION

Apparently Ireland has decided to carry on in its posi- modity. During the year, the sotion of isolation from its closest neighbors. Nationalism has overcome monetary considerations, it would seem, although the results are not all in and until the final returns are reported little can be said. Judging from today's re- to British Columbia producer turns it would seem as if de Valera will again be president but at the will of the Labor party which kept him in power for a time and then threw him out, later declaring again in his favor.

### Gold Production Increased in 1932 But Other Mining Declined According to Official Report

(General Summary by John D. Galloway, Provincial Mineralogist)

The gross value of the mineral production of the province for 1932 is estimated at \$26,675,517, a decline from the output in 1931 of \$8,207,664, or 23%. The following table shows the estimated output for 1932 and comparative figures for 1931:

A STATE OF THE PARTY OF THE PAR				
Product	Quantity		Value	
	1931	1932	1931	1932
Gold, lode, oz.	146,039	184,350	\$ 3,018.894	\$ 3,810,846
Gold, placer, oz.	17,176	19,412	291,992	330.004
Silver, oz. 7,	524,320	7,200,000	2,247,514	2,280,672
Copper, lb 63,	194,299	48,600,000	5,289,363	3.064.716
Lead, lb. 248,	783,508	253,000,000	6,742,232	5.416.730
Zinc, lb	071,247	130000,000	5,237,520	3,145,220
Coal, tons (2240 lb.) 1,	707,590	1,500,548	7,684,155	6.377,329
Structural materials			3,653,300	1,750,000
Mis. Metals and Minerals			818,161	500,000
	To a broken			A 135 D 6

The decrease in production value," metal prices, smaller outputs of in the same way as in that year zine, copper, and coal, and the alling-off of building and constructional work. On the other the Pioneer and a substantial conhand, a large increase was recorded gold production and a small increase in lead output as comared with 1931. Silver production showed only a slight decline. In the face of unprecedentedly sedustry has been maintained in a satisfactory manner.

The increased output of gold both placer and lode, is only a slight indication of the activity developing gold properties. The total gold output of \$4,140,850 as compared with. \$3,310,886 in 1931, bulk of the gold produced in the province during 1932 was sold on the basis of payment in American By agreement with the Dominion Bureau of Statistics gold production in fine ounces is valued in Canadian dollars for Statistical purposes, as it is considered standard money, rather than a comcalled premium or acvantage to producers in selling gold on the basis of American funds approximated 13 per cent. The premium therefore amounted to approximately \$538,000, making the total return to the producers in terms of Canadian funds, about \$4.678, This is an increase of 40 per

vas to be expected owing to lower cent over the value in 1931 figured

\$34,883,181 \$26,675,517

the premium was quite small. Lode gold output is higher because of an increased return from tribution from the Lorne operatited. The loss of the Reno mill by fire in February, 1932, stopped production from this property, but construction and development arger output from this property in 1933 than previously. Premier continued as the leading gold producer at practically the same rate of output as in 1931. Less gold was produced as a by-product of copper-mining, owing to curtailment of tonnage treated. Many small gold properties contributed to the total production.

The estimated silver output of 7.200,000 ounces shows a decline of about 300,000 ounces as compared with 1931. The principal producers were the Sullivan and Premier mines. The Wallace Mountain silver camp, Greenwood Mining Division, maintained profitable production even at present silver prices and development has maintained the usual ore reserves.

Copper output estimated at 48 .-600,000 pounds showed a marked decline from the 63,194,299 pounds produced in 1931. Practically the entire copper production of the province is made by the Granby Company's mine at Anyox and the Britannia. Drastic curtailment at the latter caused most of the derease in production. The continued operation of these mines is threatened by the 4-cent duty imposed on copper entering the Unipreviously been marketed. Other future is obscure.

The lead output for the year is estimated at 253,000,000 pounds as compared with 248.783,508 pounds in 1931. This large tonnage is produced almost entirely by the Sullivan mine of the Consolidated Company. It is notewarthy and encouraging that despite a lower price for lead, that the Consolidated Company was able to continu" production at a slightly higher that the sales of the metal have kept pace with the output.

Zing production for the year is of the election. estimated at 130,000.000 pounds as compared with 205,071,247 pounds The Lillian D. of the Forestry in 1931. ## Prince Rupert Beats Vancouver In One Respect

The Vancouver Province of recent date has an article telling of four generations in one home, that of the Gamble family at 2043 Collingwood. Naturally Mayor Stephens cannot allow his record to be beaten or even equalled. Mention was recently made of his family having four gererations of the same name in one house. But he can go one better than that. Here is the complete record.

At 412 Emmerson Place, resides Mrs. Annie Stephens, 85; her son. Mayer M. M. Stephens, 60; Fred H. Stephens, 31: Fred H. Stephens, Jr., 6, making the four generations, without change of name, and three eldest sons

On the same street and in the same block live Mrs. Olson, 427 Emmerson Place, daughter of Mayor Stephens, and her two little sons, Arthur and Frank, again equalling the Vernon and Edmonton records
