Common Sense Suggestions to Readers of the Daily News

Influenza is going its deadly rounds. Take every possible precaution to avoid coming down with the flu. These simple rules are based on sound medical opinion:

Get lots of sleep and eat wisely; it is the run-down man or woman who usually succumbs first to germs.

acid condition invites colds and other weakening disorders. Keep the bowels open so poisons will not accumulate

and lower your resistance.

Keep the system alkaline; an

Get plenty of fresh air and breathe through your nose. Avoid any close contact with others; remember, flu is highly contagious.

Don't dose yourself with a lot of medicine. You can alkalinize your system against colds with a little Phillips' Milk of Magnesia. If you should catch cold, take Aspirin immediately; if your throat feels at all sore, crush some Aspirin tablets in water and gargle. But if you detect any sign of flu, or even suspect it, get to bed at once and call a doctor.

## WATERFRONT WHIFFS

Pacific Halibut Banks Have Even Greater Production Possibilities—Changing Pachena Engine— Waterfront and Chamber of Commerce

Investigations which it has carried on during the past few years have satisfied the International Fisheries Commission, representative of Canada and the United States, that the halibut fishery of the North Pacific, which was being rapidly depleted, can not only be maintained as the world's most valuable fishery of the kind but can be made productive of a greater abundance

The investigations show that the their part in community affairs? desired end can be accomplished by
