### WHAT DOES IT MEAN?

Yesterday afternoon an order was sent by the newly formed Horticultural Society for over seventeen hundred rose bushes for people who during the last three days have put in orders for them. The roses are being sold at cost with the object of carrying on the work of beautifying the city and making it known as a city of roses rather than a city of rain.

The movement was commenced rather late in the season. Had it been a few weeks earlier two thousand roses could easily have been ordered. Many residents had already purchased their supplies, mostly from out of town points.

If it is found that this importation is successful it is possible that it may be repeated next year unless some local florist decides to take it up, order in quantities and sell at a very small margin of profit so that the work will be accomplished through legitimate business channels.

In putting on the drive this spring there was no thought in the minds of the promoters of competing with local stores. The season for rose planting was almost over before the drive commenced. No personal canvass was made, the only publicity given being through the medium of the Daily News and the response was wonderful. One person was kept busy in the newspaper office most of two days answering inquiries and taking orders. All this was done for the good of the cause and the secretary of the association also gave his time without remuneration just for the satisfaction of knowing that he was doing something to help beautify the city and encourage the cultivation of flower gardens.

The response to the move of the Horticultural Society indicates that people are anxious to do something if they are only shown how. It indicates a genuine desire to improve the city and should lead to better gardens everywhere. It also seems to indicate that the period of financial depression is rapidly passing.

### INVESTORS SHOULD READ

People who may contemplate making investments or speculating in stocks should read the summary of the address given by Dr. J. T. Mandy to the Rotary Club yesterday. He made clear the difference between investment and speculation and warned those who had a little money against becoming what is generally known in the rather vulgar parlance of the curb as "suckers."

In these days when so many people like to dabble in stocks or when they are willing to listen to the siren voice of the promoter, the advice of Dr. Mandy to investigate well before investing is very appropriate.

## SMELTERS ACTIVITY

Consolidated Plans Another Busy Season This Year in Omineca Mining Division

### Making Ready

Early Presence of Field Engineer In District Believed Significant

Consolidated Mining & Smelting Co., according to word received in Prince Rupert, is already laying plans for another season of active development this year of its far flung interests in the Omineca mining division.

The most important operation of Smelters in the interior so far is the large scale placer development at Slate Creek in the Germanson River section near Manson Creek which, under direction of W. M. Ogilvie and with a crew of between forty and fifty men employed, came into production last fall.

Other Consolidated interests on which extensive development is expected to be continued this year are the rich gold deposit known as the Polaris Group at the head of Mesilinka River, copper properties in the Thutade Lake country, chalcopryite and gold claims on Morice Mountain near Bear Lake at the headwaters of the Skeena River and the borinite and malachite Driftwood property.

The presence of late of H. C. Giegerich, field engineer for Consolidated from Kimberley, in the interior is taken as evidence that the company is preparing for another active season both north of and in the immediate proximity of the Canadian National Railways line.

The nearest of the mining properties on which the company has been active during recent years is not less than 100 miles north of the railway line. At present the chief means of access to the properties has been by airplane, the company having maintained a machine with Ken Dewar as pilot and bases at Burns Lake and Fort St. James.

Smelters activities in this remote region are believed by many to be based on the ultimate prospect of a railway being built westward through Peace River Pass to the Pacific Coast at Prince Rupert or Stewart.

## Why ARE You Always Tired?

Why do you have to go through days that seem endless—days when your whole body seems limp and weary? Probably you will be surprised when you learn the answer.

That answer is very likely that your system is not providing complete elimination of body wastes. Don't shake your head. Regularity of habit does mean complete elimination. In fact, incomplete elimination troubles thousands who never suspect it because they are regular. That is why headaches, indigestion, and drowsiness occur.

Save, sensible habits, plus an occasional refreshing, pleasant-tasting glass of Andrews Liver Salt will keep your system in fine tone. Eat moderately, sleep sufficiently, take plenty of fresh air and exercise, and once or twice each week enjoy an invigorating glass of Andrews, to help Nature keep your system thoroughly clear of impurities.

Do these sensible things and you will keep fit. Your appetite will be good—and you will escape the dreary days of physical depression.

Get Andrews Liver Salt from your druggist to-day and adopt these simple, inexpensive rules against the common little ailments—in ten, 25c and 50c. New, large bottle, 75c. Sole Agent: John A. Hartley Co., Ltd., Toronto.

### DANGERS OF SPECULATION AND HOW TO AVOID BEING ON "SUCKER LIST"

(Continued from Page 1)

anyone for the asking. Also the city was fortunate in its local brokerage offices where sound advice could be obtained.

By making a study of the conditions from departmental reports it was easy for the investor to choose between the unsound fairy tales of the promoter and sound information received through the department of mines. In spite of the information available and the efforts of the government to protect investors, there would be many a "horn lamb."

Dr. Mandy then gave a number of instances where speculators had won out.

These had been sound speculations based on knowledge. He told how Harry Oakes had discovered Lakeshore and had been turned down by the big companies. He then interested his friends in the find and secured sufficient capital to finance development. Optimism and faith buoyed him up and he had been able to keep a controlling interest in what had become the greatest gold mine in Canada. He has been offered as high as \$32,000,000 for his 52% interest.

Other examples of sound speculation were seen in those who put their money into McIntyre in the Porcupine district, the promoters of which barely escaped prosecution. Teck-Hughes, Bralorne and Pioneer owed their existence to the speculations of the public. Cariboo Quartz was another example. Two courses were open, one to be a speculator and the other a gambler and a sucker.

### Kinds of Investments

The speaker then outlined the various kinds of mining investment and speculation, the price of shares to be in inverse proportion to the risk.

1. A producing mine with ore blocked out, the life and value of which could be calculated. This was a sound investment but the price of the stock would be high.

2. The mine in which it was possible to anticipate the advance in price from the advance in price of mineral. This was a speculative investment.

3. The mine in which an advance could be anticipated through the finding of new ore bodies. This too was a speculative investment.

4. The mine with ore blocked out of sufficient quantity to justify putting in a mill was a sound investment.

5. A company that by means of surface and other exploration had good showings was a speculation and the person putting up the money should be in a position to lose.

6. A property in proximity to a good mine in which the shares were low in price would be purely speculation, for proximity to a good mine did not necessarily mean anything.

7. Finally the property in a new area. It was people who speculated in these who had brought the industry to its present advanced state. But for them many properties could not have been developed or mining areas discovered. People putting up their money should be in a position to lose, as the possibilities were remote.

The speaker urged that his hearers avoid the high pressure salesman. If they speculated with their money, they should do so in a sound manner. They should gamble with their eyes open.

### Drug Company Allowed \$73,000 in Ontario Court

TORONTO, April 13.—The Louis K. Liggett Co. has been allowed \$73,000 as part of its claim against the trustee for Schulte United Ltd.

## The Letter Box

### WATER SERVICES

Editor, Daily News:—

According to a notice in the press the City of Prince Rupert is going to discontinue water services to some of its citizens commencing April 15.

Is the City of Prince Rupert ready to be responsible for epidemics of disease which will follow this drastic action? Epidemics due to such action would isolate the city, curtail halibut landings and would be published throughout the land, thus giving to Prince Rupert an unsavory name.

Could the City of Prince Rupert cope with such epidemics of disease? Can the City of Prince Rupert legally and morally deny water services to any of its citizens? Has not the provincial department of health something to say in the matter?

C. D. CLARKE.

## New York Lady's Jewelry Returned

NEW YORK, April 13.—Jewelry valued at \$30,000 belonging to Mrs. John Loeb, daughter of Arthur Lehman and niece of Governor Lehman of New York, was returned as mysteriously as it had been taken.

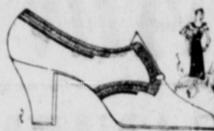

### POULTRY RAISER CONQUERS "ROUP"

Praises Minard's Liniment As Remedy for Roup or Bronchial Flu

Read in this letter from G. Minvielle, Fort Garry, how he checked Roup (Bronchial Flu) when it broke out among his young hens. "After trying other remedies and obtaining no results whatever," writes Mr. Minvielle, "I tried Minard's Liniment, five to six drops on the tongue and sometimes more, depending on the birds. I am positive that it helped me out a lot." Minard's Liniment is a tried and proven remedy for sprains, burns, bruises and skin diseases, as well as for Bronchial and Rheumatic trouble. For sale by all

## ANOTHER PROPERTY OPERATING

Work Being Resumed on Glacier Creek Mine at Stewart—To Extend Tunnel

STEWART, April 13.—Further evidence of increased mining activity in the Portland Canal district is given by the announcement that Glacier Creek Mining Company Limited will start a program of work as soon as conditions on the ground permit which it is expected will be in about a month.

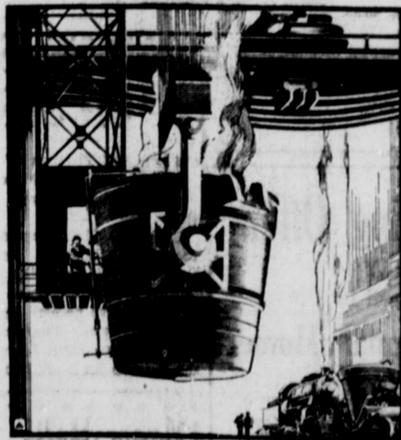

A contract has been let to drive 170 feet from the end of the main tunnel, now in 571 feet. The objective in the extension of the tunnel is to open up a large vein struck during diamond drilling operations some years ago at which time shortage of funds compelled the closing down of the operation. This vein, where intersected, was seven feet in width with a good proportion of milling ore, carrying values of gold and silver. The vein is supposed to be a continuation of the main Dunwell vein now under development.

### TAKE OVER GOLD MINE

(Continued from page one)

quired and intend to operate. A crew of seven men is already at work opening up the workings on the property which has been closed down for some years pending settlement of an estate. The property, upon which half a million dollars has already been expended and which is equipped already with mill and power plant, was a successful shipper in previous years. The ore runs about \$20 per ton in values, principally gold.

During his stay in Prince Rupert, Col. Ryan was met by Lieut.-Col. S. D. Johnston and Major C. V. Evelt of the First North B. C. Regiment and made an inspection of the old Auditorium building on Sixth Avenue West which it is planned to convert into an armory and headquarters of the First North B. C. Regiment, 102nd Battalion, Col. Ryan, who commanded the 102nd Battalion overseas during the latter days of the Great War and in which unit he naturally still maintains a deep interest, expressed the hope that the department would endorse plans for the new armory here and stated that he would do everything possible to assist personally in the matter.

### FOR SOUND INDUSTRY

Industry and trade are the means by which a country makes effective use of natural wealth. The Royal Bank has always been ready to encourage sound Canadian enterprise. It has maintained this attitude through many years of varying conditions.
