OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile—Without Calomel
Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely correct such a condition, by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.
