Serious Conflagration in Windy City Raged For More Than Twenty-Four Hours—Believed of Incendiary Origin—Relief Measures Being Organized

CHICAGO, May 21: (CP)—Feared to have caused three deaths, all being firemen engaged in the fighting of the flames, and injuries to at least fifteen hundred persons, a dozen or so of them being seriously burned, as well as occasioning damage estimated at upwards of \$10,000,000, one of the most serious conflagrations in the history of the city of Chicago was under control last night although still smouldering after having raged for more than twenty-four hours. Much of the stockyards section of the city was under virtual martial law to prevent looting and the state government and city, with the assistance of such organizations as the Red Cross, was instituting relief measures, upwards of five thousand people being homeless as a result of the holocaust. Hundreds of people had no other shelter than the city parks pending the organization of relief.

The fire was believed to have been of incendiary origin. Already a searching investigation of the circumstances has been instituted. Twelve major industrial and business buildings, a number of tenements, scores of private residences and several smaller buildings were destroyed. During the height of the flames there was much excitement and confusion.

Twelve square blocks of packing town property was affected by the conflagration. The International Amphitheatre, home of the International Stock Shows, was among the buildings wiped out.

With livestock pouring in from all sections it was a case of "business as usual" today and workmen started clearing away ruins for the rebuilding program.
