CENTRES OF PUBLIC INTEREST

At one time anything Russian was of interest to the public. Then the interest shifted to Italy and to Germany and occasionally to Russia and Japan. For a week or two Victoria was all absorbing and all eyes were on Premier Pattullo. Today Ottawa is the centre and Premier Bennett is the star actor in the comedy. People are watching Ottawa closely and wondering what is about to happen there.

WORK AND WAGES FIRST

During the recent campaign T. D. Pattullo promised the people of this province work and wages. In that effort he expected to get the co-operation of Premier Bennett as a national duty. Judging from news coming out of the national capital, Mr. Bennett may refuse to co-operate. If he takes that stand the British Columbia premier will be reminded that "work and wages" was what he promised and what he must give the people of this province, no matter what else may be neglected. Men who have been without remunerative work for years are not interested in hearing of financial recovery unless it makes it possible for them to finance their households. Already there is more employment in the province as the result of increased confidence and greater demand for commodities but there must be more than that. If Mr. Bennett will not co-operate in this work, then it is just too bad for Mr. Bennett. But we still think he will. If he does not, we shall be sorely disappointed in him.

INVESTMENTS IN CANADA

There is something like two and a quarter billion dollars of money from Great Britain invested in Canada and nearly four billion dollars of United States money. From all other countries the amount invested in this country is considerably less than two billions. This should indicate that United States more than any other country would be interested in the welfare of Canada. Set against the financial interest is the sentimental interest, the interest which comes from being a member of the same empire. It is probable therefore that Britain is much more interested in the welfare of Canada than is the United States. British money is also invested in the United States in huge sums so there is a financial tie there too. An interesting triangle!
