PREMIER PATTULLO TALKS FINANCE PROVINCE MINERAL PRODUCTION LAST YEAR INCREASED

B.C. Prime Minister Still Thinks Works Program Is Way Out

This Province Has no Intention of Knocking Props From Under Canada's Integrity—Industry Needed to Solve Depression

VANCOUVER, June 7: (CP)—"British Columbia intends to pay one hundred cents to the dollar on principal of her debts but we believe we are paying too much interest," Premier T. D. Pattullo told a joint luncheon of the Vancouver Board of Trade and Canadian Club here yesterday. He believed both the Dominion and provinces would have to refund their debts.

NOT GOING TO ARGUE

Fullerton Deems it Improper to Enter Controversy With Beatty Over Amalgamation

OTTAWA, June 7:—Hon. C. P. Fullerton, chairman of the board of trustees of the Canadian National Railways, yesterday expressed the opinion that it would be improper for the trustees to enter into a controversy over suggestions for amalgamation publicly advanced by E. W. Beatty K.C., president of the Canadian Pacific Railway. Chairman Fullerton says that he is not one of those who believe that the Canadian National is a hopeless proposition. The net earning power, he continued, is at the present time obscured by the depression and unwieldy capital structure.

Value of Output of Mines In 1933 was Well Ahead of 1932

Gold Again Led the Way With Silver Down Somewhat—Over Three Million Dollars in Dividends Paid

VICTORIA, June 1:—Gross value of British Columbia's mineral production for 1933 was \$30,674,486—an increase of \$2,432,868 or 8.61% over the previous year. The 1933 gold production of the province of \$5,027,530, at the standard price of \$20.67 per fine ounce, is an increase of 22.6% over the 1932 output and 51.9% over that of 1931.

Producers of gold received an average during 1933 of \$28.60 per fine ounce so that their total return in Canadian funds on account of gold was \$6,955,716. This is an increase of 107.5% over the returns of 1931 when the "premium" was small.

These figures show the 1933 gold production to be highest in value in Canadian funds ever recorded in the province and establish gold as the leading mineral product of British Columbia.

With the maintenance of the present world gold prices during 1934 the value of the present year's production may well reach an aggregate of \$11,500,000 in terms of Canadian dollars.

Placer gold production last year showed an increase in value of \$59,976, or 17.3% over that of the previous year.

Increase in the world price of gold has established many mining properties, hitherto of doubtful interest, as economically attractive propositions. This has broadened the field of development work while established producers have been able to materially expand their ore reserves.

Silver output for 1933 was slightly lower in quantity but had a value of \$2,650,270, an increase of 17.3% due to the higher average world price received for the metal.

Lead and zinc productions show small increases in quantity and more marked improvements in value because of the generally healthier condition of the market.

During 1933 mining companies paid dividends totalling \$3,034,484 (Continued on Page Four)
