### NORTH YORK

Unless a general election is called in the comparatively near future, it will be necessary to hold a by-election in the federal constituency of North York, the Conservative member for which, Col. T. Herbert Lennox, died this week. Such a by-election would be another important test of public opinion as far as the Bennett government is concerned. Liberals and other opponents of Premier Bennett claim that he is losing his grip in traditionally Conservative Ontario and the recent by-election in North Oxford, where the Liberal won by a huge majority, seemed to confirm this opinion. The result in North York, which is one of the Toronto seats, will be a sign of the times.

True, North York cannot be said to be a traditionally Conservative seat for it is the old political home of Former Premier W. L. Mackenzie King who, it is to be recalled, was defeated there in the general election of 1925 by the late Col. Lennox. After losing the Toronto seat, Mr. King re-entered Parliament by way of Prince Albert constituency in Saskatchewan which seat he has since held. In the 1926 election Col. Lennox retained North York by defeating H. A. Sifton, scion of a famous Liberal family, and in 1930 was re-elected over W. P. Mulock, another prominent Liberal.

As North York goes in the by-election, should one be held, so may Canada. It should be good fighting ground.

### G. G. McGEER IN EAST

G. G. McGeer seems to have taken Ottawa by storm in elucidating to the Banking Committee his plan for a central bank and for a credit system which would replace our present financial system. Following his evidence before the committee he was immediately invited to give addresses on the subject in Toronto and Windsor and he will broadcast in Toronto tonight. He was dinner guest of Rt. Hon. W. L. Mackenzie King Wednesday evening and it is hinted that the leader of the Liberals at Ottawa is in full accord with him in his proposed policy.

It is now being suggested that McGeer should go into federal politics, stump the country on his financial policy and go into the next Mackenzie King administration as minister of finance. At any rate the financial war is on and British Columbia is being heard at the nation's capital as never before.

## CHURCH NOTICES

### FIRST PRESBYTERIAN CHURCH

Minister, Rev. W. D. Grant Hollingworth, B.A.  
Organist: Mrs. E. J. Smith

11 A.M., Sermon Subject: "THE BIBLE—THE WORD OF GOD"  
The trustworthiness of Scriptural truth based on the results of criticism and research.

12:15, Sunday School 12:30, Westview School

7:30 P.M., Sermon Subject: "THE INSPIRATION OF HOLY SCRIPTURE"  
How is the Bible inspired? Can it be accepted literally? Can we "believe" it from "cover to cover"?

All visitors welcome

## KILLIN IS PRESIDENT

Canadian Legion Football Club Elects Officers For Year

A meeting of the Canadian Legion Football Club was held last evening in the clubrooms. George Dawes was in the chair. The chief business was election of officers for the 1934 season and the following were chosen:

President, H. Killin.  
Vice-president, R. Woods.  
Secretary-treasurer, C. L. Barker.  
Manager, Alex Harvey.  
Trainer, Jock McGreish.  
Executive—H. Richmond, Sam Currie, H. Hamilton, Geo. Dawes.  
Representative to Football Association, C. L. Barker.

The Legion Club is looking forward to another successful season. With most of last year's players available and some new young talent in sight there is every prospect of a good year.

## Speedy Recovery Now Seems Sure

Joe Wright, Famous Canadian Sculler, Continues to Show Improvement

TORONTO, May 5.—Joe Wright jr., famous Canadian sculler and former world's champion, who has been suffering from internal hemorrhages for the past week following an attack of blood poisoning, is now showing every indication of a speedy recovery.

## SPORT CHAT

New York Giants improved their margin of supremacy in the National League by again defeating the Pittsburgh Pirates in Pittsburgh Thursday while the Cubs were being blanked at Chicago by the Boston Braves. The lead of the Giants, as a result, became one and a half games. The Braves, by virtue of their victory, crept into a tie with the Pirates for third place.

## JUNIOR ELKS' FIRST DANCE

Jolly Affair Held Last Night With About One Hundred Couples In Attendance

The newly organized local Junior Elks' Lodge held its grand opening dance last night in the Elks' Home, the affair being most enjoyable and a fine success with about one hundred couples present. From 9:30 p.m. until 2:30 a.m. dancing was in full swing with excellent music by Charlie Balagno's orchestra and Walter Smith making a genial master of ceremonies. At midnight delicious refreshments were served.

The hall was gaily decorated in Elks colors of purple and gold. The committee in charge consisted of Wigner Bryant, W. Steffensrud, Allan Davies and Pat Palmer.

## Mail Schedule

## BIRTHDAYS OBSERVED

Happy Party Held Last Night in Honor of Three Members of Jolly Pedro Club

Fifteen members of the Jolly Pedro Club gathered last night at the home of Mr. and Mrs. F. W. Hart, Sixth Avenue West, in a happy celebration of the birthdays of Mrs. Hart, Mrs. J. W. McKinley and James Hampton, all of which fell of successive days this week. After a sumptuous dinner had been served, the evening was spent in the playing of bridge, Pedro and other games while community singing was also lustily engaged in. Warm good wishes were extended to the three guests of honor for many happy returns of their birthdays and there were many presents. For Mrs. Hart it was the seventieth milestone, for Mrs. McKinley, the fifty-ninth, and for Mr. Hampton, the seventy-second.

Those present were: Mr. and Mrs. Hart, Mr. and Mrs. J. W. McKinley, Mr. and Mrs. James Hampton, Mr. and Mrs. W. D. Moxley, Mr. and Mrs. John Murray, Mrs. Norman Fraser, Mrs. J. Melo, Mrs. J. C. Gilker, Miss Beulah McKinley and Miss Helen Hampton.

## Wants to Know Why Gt. Britain Excludes Trotsky

LONDON, May 5.—Jack McGovern, fiery Laborite Member of Parliament, demanded to know in the House of Commons why Leon Trotsky had been refused permission to enter Great Britain when "so many Nazi revolutionaries are admitted."

## Soviet Refuses To Send Jewels

Century of Progress Will be Unable To Exhibit Famous Russian Gems

MOSCOW, May 5.—The Soviet government has refused the request of the Chicago Century of Progress Exposition to send the Russian crown jewels there for exhibition this summer.

## DANCING DISPLAY

Pretty Entertainment Last Night By Mrs. James Watt's Pupils

Another of the increasingly popular dancing displays by the pupils of Mrs. James Watt was given in the Oddfellows' Hall last evening before an appreciative audience of over 200 persons.

The program, which was opened by ten tiny tots who danced the Haymakers' Jig, included square dancing, country dancing and round dancing. Forty-five took part and, of these, 25 were in Highland costume.

Among the outstanding features of the evening was the Highland Reel and Irish Jig performed by eight girls in costume, being Muriel Eby, Jean Krause, Margaret Lamb, Helen McDonald, Edith Ritchie, Joan Squire, Betty Wilkinson and Jean Watt. The Sweet Dance by sixteen pupils (fourteen girls and two boys) was performed with neatness and finish. In addition to others those participating included Jock Watt, George McAfee, Gertie Garlick, Georgina Lamb, Jean Smith, Doreen Croxford, Jean McAfee and Thomasina Krause.

Three tiny beginners, Peggy Barclay, Norma Squire and Dorothy Smith, delighted the audience with the Highland Fling. Three more advanced pupils, Dorothy Davidson, Isobel Gay and Pat Love, also did the Fling and, along with June Ayres and Ella Murray, gave an exhibition of the sword dance.

Another dance which was well received was the Seann Truibhas by eleven girls. The group dancing, which included the Ninesome Reel, polkas and many other numbers, in which an additional twenty-five pupils participated, was very pleasing.

Jas. Hadden was master of ceremonies for the evening and music was supplied by John Bremner, J. B. McKay, Jas. L. Lee and James Watt.

Following the exhibition two hours of dancing was enjoyed by the grownups.

## Balance Sheet For Boys' Band

Concert Sponsored by Toc H on April 6

Mondays, Wednesdays and Fridays ..... 6:30 p.m.

From the East—  
Tuesdays, Thursdays and Saturdays ..... 10:00 p.m.

## Quick Relief Now From Neuralgia

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, get *discovers*.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And thus is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST.  
Drop an Aspirin Tablet in a glass of water. Note that BUBBLE it touches bottom, it has started to disintegrate. What it does in this glass it does in your stomach. Hence its fast action.

Does Not Harm the Heart

## Soil Conditions and Plant Growth

What is Meant by Fertile Soil—Prince Rupert Soil is Mostly Peat, Is Badly Waterlogged and Must be Converted

(By R. H. BEDFORD)

**PART III.**

The plant uses abundantly nitrogen, phosphorus and potassium and, for the matter of marshalling the facts in order for easy understanding, these three substances might be classified as the "basic plant ration" to which the others are added in different quantity depending upon the particular kind of plant and the soil. A fertile soil will have an abundant and easily available supply of these food substances.

Much thought has been given by scientists to the classification of soils during the past decade but it will suffice for the purpose of comparison to divide them into two major groups—mineral and humus or peat soils. The mineral soil is derived from rock material which constitutes its framework. It might be looked upon as the skeleton of the soil. In among these rock particles are tiny pieces of dead vegetation that have grown since the soil occupied its present position. There are, of course, many types of soil even within short distances. This is because of the many different kinds of rock, in the erratic distribution of which they have been formed and the manner in which they have been spread over the earth by the varied climatic changes during the millions of years of their making. Some mineral soils are much darker than others. That condition is generally due to a rather high amount of dead vegetation incorporated in it and partly decomposed by the micro-organisms. Others are quite light and that is generally due to a small amount of dead vegetation which has not been so energetically decomposed.

Although there is this variation in the vegetation or organic material, there is also a decided difference in the kind of rock of the mineral soils. And both of these variables, the vegetation and mineral, each play an important role in the relative fertility of the soil.

Instead of the dead vegetation becoming incorporated with the mineral particles it may lie on the surface of the soil, where it decays to form peat, the mineral part remaining underneath, forming generally an impervious layer of clay. The formation of peat generally takes place in those regions where the climate is cool and wet, as in Prince Rupert. Peat holds a large quantity of water and, because of this, it swells up and stops the circulation of air and water, so that a waterlogged condition results which impedes the rotting of the dead vegetation. Under these conditions the raw vegetation accumulates and forms the typical peat moors. Three main types of peat moors are distinguished according to their vegetation and the climatic and topographical conditions: (1) High Moor—formed under conditions of heavy rainfall. This is very infertile and is generally dominated by the moss known as sphagnum, one of the few plants that can survive the waterlogged and highly acid conditions. (2) Heath is formed where the climate is drier. (3) Low Moor is formed in low lying wet places. This type of moor will generally yield a fertile soil if properly drained.

In Prince Rupert the virgin soil is characterized as a high moor type of peat, which is to say, that it consists mostly of sphagnum moss. This virgin peat soil by itself is quite unsuited for the growth of flowers and vegetables. Why? Because (1) it is generally waterlogged, (2) it does not contain certain plant foods that are essential for the nourishment of the growing plant, (3) it is much too acid for most plants. Consideration of these three conditions will indicate just what is necessary to convert such infertile soil into a productive one.

Oscar Fulton, son of Mr. and Mrs. W. O. Fulton of this city, following the close of his year's studies at the University of British Columbia in Vancouver, is planning on leaving the southern city within the next few days to make his way to his home here by bicycle over the Cariboo and central interior highways.

## THE ENGINEERING ACT OF THE PROVINCE OF BRITISH COLUMBIA Practising as a Mining Engineer

To Whom It May Concern:

TAKE NOTICE that by the terms of the Engineering Act of the Province of British Columbia only those who are holders of a license to practise either as a Mining Engineer or a Geological Engineer are authorized to make mining engineering reports or geological engineering reports, or to sign otherwise in the practice of a Mining Engineer or a Geological Engineer.

Lists of engineers entitled to practise will be found in the British Columbia Gazette of February 15, 1934 and April 19, 1934, or can be obtained upon application to:

490 BIRKS BUILDING, Vancouver, B. C.  
May, 1934.
