WHEREAS, by the Municipal Clauses Act and Amending Acts, the City of Prince Rupert is authorized to construct, operate and maintain works for supplying for any or all purposes, water, water power, electric light, and electric power to the inhabitants of the said city and localities adjacent thereto, and for regulating rates, conditions, and terms under which such works are to be completed and used;

AND, WHEREAS, it has been considered expedient for the City of Prince Rupert to construct and maintain works to obtain a permanent supply of water for the use of the inhabitants of the said city, and any persons, who may be adjacent to the pipe lines, constructed hereunder, such water to be used for all purposes for which the said City may legally supply water, such works to be so constructed as to furnish electric power, to be used by the said City for all purposes for which the said City is authorized by statute to apply the same;

AND, WHEREAS, the water from Woodworth Lake, situated on the Thompson Peninsula, can be utilized for the purpose of obtaining a good and sufficient supply of water for the said City, and also for the purpose of supplying electric power for the use of the said City;

AND, WHEREAS, instead of constructing two separate systems, one for the supply of water, and the other for producing electric power, the Council have concluded that a combination of the two systems in one will be much more economical and equally as efficient.

AND, WHEREAS, in order to effect such a combination, it will be necessary to install mains from the point of diversion to the point, where the power plant to be constructed, of sufficient diameter to carry water for both purposes, which will be much more than would be required for either the water supply or the electric system alone;

AND, WHEREAS, considering the above recited facts, the Council have determined to treat the whole scheme as a joint undertaking and to provide for the construction of the same as such.

AND, WHEREAS, the general description of the proposed Hydro-Electric system is as follows:—

A dam to be erected as a suitable point near the outlet of Woodworth Lake; from that point the water to be piped down to a point at or near the head of Shawatlans Lake, the said pipe to be of a capacity large enough to carry sufficient water for the supply of the City of Prince Rupert, and also to operate at or near the head of Shawatlans Lake, a plant for the purpose of generating electricity; and after leaving the head of Shawatlans Lake the water to be piped into the City of Prince Rupert, and there be distributed by a proper distribution system, and the electric power will be brought into the said City by transmission lines from the head of Shawatlans Lake.

AND, WHEREAS, the amount of the debt necessary to be incurred by the City of Prince Rupert for the construction of the said Hydro-Electric Plant, and necessary distribution system connected therewith, is the sum of \$550,000.00.

AND, WHEREAS, the said debt will have to be raised annually for the purpose of paying the said debt and interest will be \$28,948.54.

AND, WHEREAS, the said Hydro-Electric System cannot be completed before the first day of September A. D. 1912, and, therefore, the amount of rates, charges, and rentals for the use of water or electric power will during this present year be nil.

AND, WHEREAS, no money is already charged against the rentals, rates and charges to be derived from the said Hydro-Electric System.

AND, WHEREAS, the estimated amount of rentals, rates, and charges that will be derived from the said Hydro-Electric System after the same is completed is the sum of \$72,500.00.

AND, WHEREAS, the sum necessary for the payment of interest during the currency of the debentures to be issued hereunder is \$24,750.00 per annum.

AND, WHEREAS, the sum to be set aside annually to discharge the debt, authorized to be created by this bylaw, is the sum of \$4,198.54 per annum, and is proposed to be set aside such annual sum by depositing the same annually at interest in a chartered bank or trust company in Canada or by the purchase of debentures of the said City at a price not above par or by both such modes of investment, or by investing the same in any manner which a Municipal corporation may legally adopt.

AND, WHEREAS, the amount to be raised annually for the payment of the said debt is arrived at by estimating the interest to be derived from the annual investment of such sum at the rate of three and a half per cent. (3 1/2 per cent.) per annum.

AND, WHEREAS, the total amount of rateable land and improvements in the City of Prince Rupert, according to the last revised assessment roll is as follows: Land, \$12,223,041.00; improvements, \$497,965.

AND, WHEREAS, it is estimated that after the said Hydro-Electric System completed, the rentals, rates, and charges to be collected therefrom will be sufficient to pay the annual amounts required to pay the interest and sinking fund on the debt to be raised under this Bylaw, and that there will be no deficiency to be made up under the guarantee to be given by the City as hereinafter provided.

AND, WHEREAS, the City intends to issue debentures for the amount of said debt, being \$550,000, by the sale of which to realize the moneys necessary for the said purposes, the said debentures to extend for a period of fifty (50) years and to be secured upon the rentals, rates, and charges to be derived from the said Hydro-Electric System for the supply of water and electric light and power, and to be secured by the guarantee of the City at large.

AND, WHEREAS, this Bylaw cannot be altered save with the consent of the Council and Governor in Council.
