B.C. PUTS THEM
ALL IN THE SHADE

When It Comes to Producing Copper This Province Beats the Other Eight—Interesting Figures on Minerals.

Features of the mineral production of Canada for the past year were the increase in the gold production of the Yukon from \$3,960,000 for 1909 to \$4,550,000 for 1910. The silver production of Cobalt increased to 29,375,000 ozs. for 1910, this being 4,552,091 ozs. more than for 1909. The copper production of Ontario was important, the nickel-copper ores of Sudbury producing 19,259,016 lbs., while Quebec contributed 957,178 lbs. British Columbia puts all the rest of Canada in the shade as a copper producer, the output of this Province having been 36,000,000 lbs. The nickel production of Ontario, however, exceeds the copper production of British Columbia, having been 37,271,033 lbs., for the year. Asbestos reached 75,678 tons. Iron ore showed a falling off of 14,000 tons. Cement production was 4,396,283 barrels, an increase of 249,574 barrels over 1909.

CANADA'S LUMBER

How It Is Used and Its Worth

Statistics of the lumber used during the past year have been received from 162 companies, consisting of the agricultural implement and vehicle manufacturers of Canada in six provinces, by the Forestry Branch of the Department of Interior. 76,474,000 feet of lumber were used worth \$2,513,265, or an average cost of \$32.86 per thousand. Ontario used nearly 90 per cent of the total for the Dominion; Quebec purchased 6 per cent, Manitoba 4 per cent, and Nova Scotia, New Brunswick and Prince Edward Island used very small amounts. Woods used in these industries require strength and durability, which is shown by the large amount of maple, elm, oak, ash, birch, and hickory that were used. Of the native woods, cherry was the most expensive at \$104 per thousand, and iron wood the cheapest at \$15 per thousand. Mahogany at \$120 per thousand was the most expensive of imported woods. The species of woods having the technical qualities required by these industries at present grow only in small quantities in the agricultural and farming districts of Canada. For this reason the supply is rapidly becoming diminished, so that unless steps are taken to reforest or conserve the production, we must depend more and more for our supply on the United States. It is pointed out that the fact that the woods necessary for the proper building of agricultural implements cannot be secured in any quantity in Canada tends to increase the cost of manufacturing in Canada.

MADE GOOD

A Prophet and in His Own Country

J. S. Cowper, editor of the Prince Rupert News, spoke for a few minutes in support of the candidature of Ralph Smith for Nanaimo and Hon. William Twmpleman, Victoria. This brilliant speaker, who will be heard in the Victoria theatre displays a commanding grip of the subject on which the election is being fought—reciprocity—and his wealth of language and magnificent delivery combine with his mental qualifications in making him an outstanding figure in the campaign.—Victoria Times.

B. C. Gold

During the fiscal year ended June 30 last gold to the value of \$10,273,000 was received at the United States assay office, Seattle, Washington. By far the greater part of this gold came from Alaska, but included in the total was \$1,262,500 from British Columbia and Yukon Territory. As compared with the fiscal year ended June 30, 1910, there was a decrease of \$1,858,000 in total value of gold received.

MUST COME
TO CANADA

All Wanting Asbestos Depend on This Country—Industry Controlled by Dominion—Produces 82 Per Cent of World's Supply.

"According to the official report Canada produces 82 per cent of the world's supply of asbestos. The companies operating asbestos quarries and factories in Canada are capitalized at \$24,290,000. In 1880 only 380 tons of asbestos were produced in the Dominion, valued at \$24,700; in 1909 the output was 63,300 tons valued at \$2,300,000. In 1909, 2000 men were employed in the asbestos industry, and received wages amounting to \$1,250,000. In the Black Lake quarries, in the Province of Quebec, there are 45,000 tons of asbestos rock in sight.

"The Russians are the only real rivals as regards extent of asbestos resources, but are heavily handicapped by the excessive cost of transportation of \$35 to \$40 per ton from the Russian mines to London. Serious competition is not feared by the Canadian companies on this account.

"The asbestos slate or shingle industry is being developed by the plants in Canada, and predictions are made that in a short time 75 per cent of all the asbestos produced in the Canadian quarries will be used for asbestos shingles.

"The asbestos-slate business is only five years old, but during that time the demand for this article has increased enormously, and large factories are being established to supply the demand for this new roofing material."—London Chamber of Commerce Journal.

HOUSEHOLD HINTS

If eyelets do not look well after laundering, press them open before applying the iron, by slipping the orange wood stick or stiletto into them. Then they will retain their proper shape.

White paper should not be used for wrapping around articles that are to be put away. Chlorate of lime is used for bleaching it, and this will destroy the color of the fabric which it envelops.

An excellent way to prevent silk hosiery from being torn by stocking supporters is to sew two small strips of seam binding at the top of each stocking. Then catch the hose supporter in these loops.

When an umbrella has been used a short time make it a rule to pour a few drops of oil into the top notch about once a month, and it will prevent the ends of the ribs from rusting, and the umbrella will last longer.

When books become badly soiled on the edges, if not gilt-edged, close the book tightly, then erase the marks with an ink eraser. This will cut off all rough edges and all soiled marks, and leave the books very clean.

A large, coarse scrubbing brush hanging near the kitchen door, is a good and cheap shoe cleaner in muddy weather, especially when children are running in and out.

A nice relish to serve with fish is cabbage cut very fine and dressed with French dressing, beaten almost to an emulsion.

Basting threads when saved should be wound on a spool, otherwise they get hopelessly tangled and cannot be used again.

B. C. Productivity

British Columbia is producing, "man for man, more wealth than any other country in the world," Premier McBride made this statement recently in London, as the result of a "close study by the best economists." He told his London audience that British Columbians want their "friends and brethren in London" to get a legitimate return for every dollar they put into the Province, but they begged them to let every dollar be invested with "eyes open." As the Canadian Gazette states in commenting upon this

ON BOTH SIDES OF THE GLOBE

CURZON CLOTHING

is known and appreciated.

Curzon Clothing is sold with a guarantee. Every garment turned out reflects additional credit on the "House of Curzon." Style, quality and fit are the points studied in the producing of every garment, and it is for this reason that "The Curzon-dressed man is the well-dressed man."

For years past Curzon tailoring has been popular among men residing in Canada, for by means of the Curzon Service residents over-seas are able to enjoy absolute "Clothes-comfort" and can secure their clothing at very little more cost than in the Home Country.

Curzon \$20 Suit or Overcoat for \$8.60 is an investment. Built entirely of English materials, tailored by experts, cut by artists, it embodies all the necessary features that go to make a shapely and stylish garment. That is why our clothing is sold with a unique guarantee, a guarantee made without any restrictions whatever, and not equalled by any tailoring house on either side of the Atlantic, i.e., to refund money in full where complete satisfaction is not given.

IN THE SUPREME COURT OF BRITISH COLUMBIA.

Between John Young Rochester, plaintiff and Tom G. Sutton, defendant.

Before his Honor Judge Young in chambers, Friday the 28th day of July, 1911.

Upon the application of the plaintiff, upon hearing read the affidavit of Charles Vincent Bennett, filed, and upon hearing what was alleged by C. V. Bennett, counsel for the plaintiff.

1. It is ordered that service upon the defendant of the writ of summons and statement of claim in this action by publishing this order, together with the notice hereon endorsed, once a week for four weeks, preceding the 1st day of September, 1911, in the "Daily News," a newspaper published at Prince Rupert, B. C., be deemed good and sufficient service of said writ and statement of claim.

2. And it is further ordered that the said defendant do enter an appearance to the said writ of summons and file his statement of defence in the office of this Court at Prince Rupert, B. C., on or before the 15th day of September, 1911.

3. And it is further ordered that the costs of this application be costs in the cause.

E. McE. YOUNG, J.J.S.C.

[NOTICE]
This action is brought to recover \$1922.80, the amount due on a promissory note made by the defendant, dated 20th December, 1906, to the order of the plaintiff, payable 24 months after date with interest at 5 per cent. per annum.

Principal	\$1922.80
Interest	\$47.00
Total	\$1969.80

Notice.
In the County Court of Atlin, holden at Prince Rupert.
In the matter of the Official Administrator's Act, and in the matter of the estate of John Flanagan, deceased, intestate.

Take notice that by the order of his Honor, Judge Young, made the 28th day of July, A.D., 1911, I was appointed administrator of the estate of the John Flanagan deceased, and all parties having claims against the said estate are hereby required to forward same properly verified to me on or before the 20th day of August, A.D., 1911, and all parties indebted to the said estate are required to pay the amount of their indebtedness to me forthwith.

Dated the 28th day of July, A.D., 1911.

JOHN H. McMULLIN,
Official Administrator.

speech, Mr. McBride spoke nothing more than the sober truth when he said that the resources of British Columbia satisfy most of the everyday wants of the world at the present time—coal, iron, timber, fish, fruit and agricultural produce. Situated as it is geographically, it may expect eventually to control the trade in the Pacific. The Province has practically all the rivers of North-West America, and there are no harbors but theirs for hundreds of miles. British Columbia can therefore hardly be prevented from becoming the shipping centre of the North Pacific.

Working at a machine press of his own design at Lowestoft, Suffolk, on Monday, Archibald Dyer, a partner in a motor garage firm, was caught between a bar and the upper part of the machine and killed.
