to the daily newspaper come flashing the engrossing incidents that are at this very moment making today's history. The whole atmosphere of the daily newspaper is comprehensive action—dealing with things of the moment that have just happened, or are about to happen.

When white paper leaves the printing presses in the daily newspaper office, it is no longer some inert material,

but an active powerful force reaching the thousands who thirst for its contents.

Practically every Canadian family reads a daily newspaper.

It is an essential part of daily life and without it all would feel a distinct lossnothing can take its place.

On the newspaper's pages also are advertisements placed there by thoughtful, energetic and far-seeing merchants and producers. The best traders in Canada—the firms which grow in strength and prestige year after year-know that the daily newspaper

is as necessary to them as their raw material. When the fight is hardest-they have often proved this—it pays to strengthen their newspaper lists.

Follow their good example!
