## Living Policyholders

are Receiving

### of Life Insurance Benefits

#### Beneficiaries Receive the Balance

VEAR after year, living policyholders are receiving by far the greater share of the moneys disbursed in Life Insurance benefits in Canada.

In 1934, for example, these living policyholders received an average of over \$400,000 every working day! In that year, their total receipts of over 127 million dollars amounted to 75% of all Life Insurance benefits; the balance of nearly 42 million dollars was distributed among beneficiaries of deceased policyholders.

Through Life Insurance disbursements, thousands of Canadians from coast to coast have been able to realize their earlier ambitions. Men and women have won financial independence in their later years. Young men have obtained a start in business. Children have been educated. Families have been tided over periods of financial stress.

Life Insurance offers a safe, because it is a scientific, plan of saving for future needs. Not only does it provide vital protection for dependents but it enables millions of policyholders to make sure of money when they need it most.

As a Life Insurance policyholder, your savings are held "in trust" for you. They are safely invested on your behalf so that you can look forward to the time when you will enjoy the benefits of your own thrift.
