B. C. LUMBER FOR KING'S YACHT

Splendid samples of British Columbia's finest timber in the form of masts and booms for his majesty's new yacht (which will replace the famed old Britannia) were loaded from the Canadian National Railways' docks in Victoria on ss. New Westminster City, bound for England. One of the two big masts is shown being swung from the railway flat cars. It is 160 feet long, 30 inches at the butt and 22 inches at the top. The second measured 96 feet with a 22-inch butt. The two booms were almost as long. Weighing about seven tons each, the timbers were cut from Grouse Mountain, above Cowichan Lake, on Vancouver Island. Two months were spent selecting the carefully specified timbers.
