ATTE TIN

TORTHERN ELECTRIC Radio presents the most revolutionary departure in radio engineering ever made-the CentrOmatic Unit! Its effect on radio performance is even more farreaching, more sensational than the new metal tubes alone (which, of course, these Northern Electric sets contain).

Entirely different from anything you have ever seen! All the radio elements are centralized in the separate Centromatic Unit - that's why CentrOmatic Radio is entirely different in performance from any previous radio experience you have ever had!

Surely your new radio must have the new metal tubes! Just as surely your new radio must have CentrOmatic engineering. Only Northern Electric Radio gives you both!
