PURPOSE OF MOBILIZATION ORDER

It looks as if the purpose of Fremier Mussonni's mobilization order was not only to give the world an object lesson of what the country might do but also to test mis own people and put them all on record.

Evidently there have been murmurings and a tendency to hang back, according to some of the information received from Italy. When every man is ordered to report for war the person who does not immediately respond is a traitor to the country and will be regarded as such. It is a daring test that may make Mussonni's position as a dictator supreme.

We wonder what would happen in Canada if an order Boston for general mobilization were issued and every man ordered to fall in line, help sing the national anthem and BAHRAM IS salute the flag on penalty of being shot. It would cause BAHRAM IS consternation in cerain quarters. Happily there is no fear of such an order as long as we cling to our democracy.

MAKING REAL MEN

Early this summer the provincial government launched (CP)-The Aga Khan's great unan important experiment in the salvaging of unemployed beaten colt Bahram today won the youth, says the Victoria Times. It put several hundred St. Leger Stakes with Solar Ray young men into camps to learn mining and forestry.

The first dividends on this modest investment are now \$40,000. being paid. Already nearly half the boys in the forestry camp at Cowichan Lake, having learned to look after Pittsburg Men On themselves in the woods, have found jobs in the timber Pittsburg Men On industry, which is ready to absorb all the youngsters who make good in the government's training course.

From the mining camps comes the news that the boys are finding a little gold but, more important, are finding a keen interest in their work. Many of them will remain permanently in mining and will find their present training period of inestimable value to them later on.

The government's experiment apparently has been an c. H. Matthews ir. of Pittsburg outstanding success. It is not only turning out the best arrived in the city from the east on type of men for our two most important industries, but is rescuing boys from the insidious disease of idleness and despair which is the worst and most enduring feature of archer of some note and plans on the depression.

What a contrast there is between the active, happy bears by bow and arrow. The party young fellows in the forestry and mining camps and the will leave the steamer at Wrangell unfortunate inmates of the federal government's road and continue north aboard a camps! The chief distinction is not that the boys in the Campbell Church charter boat. provincial camps are paid more, for their wages are small, but that they feel they are doing something worth while and getting somewhere. They are learning a trade, a way of life and a love of British Columbia's wilderness which is vital in the future development of this new country. They are learning about our forests and our minerals, which will always provide jobs for a large part of our population. They are being made into useful and contented British Columbians where a large percentage of the young men in the road camps, as a result of official stupidity and lack of human understanding, are being made into listless malcontents, who may never find their feet in life.

COVERAGE

Canadian daily newspapers by themselves can do your advertising work. No other medium, nor group of media, is needed to supplement newspapers in selling the Canadian market. Whether it be Canada as a whole or a certain sector of it, which the advertiser desires to reach at once or continu-

ously, daily newspapers do a thorough and complete selling job.

The trading centres of Canada from which business radiates outward are marked and indicated by the very fact that one newspaper or more is published there every day.

Practically every Canadian family reads a Canadian newspaper every day. This

intensive coverage renders the use of other major media wholly unnecessary; to employ them is "carrying coals to Newcastle."
