Do You Want Your Daughter To Be Pretty?

Here's how one girl put roses into her cheeks and prounded out a thin face

Mothers who are anxious for their daughters to be healthy and attractive will be interested in the story of a certain young girl who was pale, rundown, underweight, when she went to a competent authority to have her blood tested. She weighed only 911/2 pounds. The test revealed the trouble. Her blood was too poor in quality to keep up her strength, weight and vitality. Her blood was below normal in the number of red corpuscles and in vitally-necessary haemoglobin. She was instructed to take two of Dr. Williams' Pink Pills (so called because they have a pink sugar coating) three times a day for a month and then return for an-

other blood test. Thirty days later a changed, happy girl came back. She had gained nine pounds. Her blood tested almost normal in its haemoglobin content and was slightly better than normal in number of red corpuscles. She felt a tremendous lot better and looked it. She had roses in her cheeks and everyone said that "her face had rounded out and she was positively pretty".

Charming color and soft clear skin depend almost entirely upon the blood, because the blood carries the vitality and nutriment that builds the complexion. The soft, clear skin of every pretty baby is proof of it. And the girl mentioned above is living evidence that good looks which have been lost through impoverished blood can be regained by taking the proper remedy.

There is no need for so many girls to endure a sallow, uninteresting complexion nor to remain listless, nervous and easily tired out. For when these are symptoms of blood that is lacking in vitality, Dr. Williams' Pink Pills will restore strength and "pep" and tone up good looks, too! Equally effective for people of all ages. Full-size box 50c at your nearest drug store.
