## ROAD PROGRAM

The program of road work to be carried out by the provincial government should satisfy every reasonable person. The south gets the big quota, which was to be expected. That is where most of the cars are and it is the part of the country where visitors from the United States use the roads most. On the other hand the north gets a share of the expenditures with a view to gradually extending the highway from Prince Rupert to the Alberta boundary. As we increase in population we shall increase in prestige and power and be able to demand more each year.

## DANGEROUS ACTION

Ethiopia is a long way from Italy and while we know little of the right and wrong of the controversy between the two nations we can easily guess that Abyssinia may be a difficult country to subjugate. There are a million men in arms, keen to defend their home land against an invader. They are equipped with modern weapons and the country is a very difficult one to traverse. Under these conditions it is possible that Italy may find the expedition to Ethiopia difficult to bring to fruition.

We imagine that Mussolini has counted the probable cost and will emerge victorious over the semi-savage people but advantage is often taken of such an undertaking to try to cause trouble at home. Such an expedition is more of an eighteenth century exploit than a modern move of a civilized nation. We must remember, however, that Britain may at any time be involved in a somewhat similar conflict in the Far East, not in a war of conquest but in an effort to retain former conquests.

Some newspapers are suggesting that uneasiness at home may have caused Mussolini to try to divert attention from home affairs by this carefully planned expedition.
