The Red Army that Calls You "General"

You'll need a microscope to see these side only measure one inch. Yet thereare billions of them serving you.

These soldiers - known to medical science as red corpuscies - give your blood its red color. They carry haemoglobin (iron-nutriment) to every nerve, fibre and tissue of your body. If these little red corpuscles become too few or do not carry enough haemoglobin look out for trouble. For it is the weakening of this army that is a danger signal of health. Persons who are rundown, anæmic, nervous, easily tired, lack vitality and strength are generally those whose red corpuscles and haemoglobin (iron-nutriment) are below normal.

There is, fortunately, a treatment that soon builds up both red corpuscles and iron-nutriment and by actual test of blood under the microscope this remedy proved its blood-building worth.

The test was applied to a group of run-down people and the blood of each one was found to be decidedly below normal. The competent authority who supervised the tests, instructed each person to take Dr. Williams' Pink Pills -called pink because they have a pink sugar coating - for 30 days, and then return for another blood test!

In that short period Dr. Williams' fine old remedy infallibly demonstrated what it can do for run-down, anæmic people. The gains made in health and strength were remarkable. The people looked and felt much better and the microscope showed how their red corpuscles had been increased and their iron-nutriment, too!

These tests form a reliable guide for Dr. Williams' Pink Pills. The shortages of your blood will be made up and strength, vitality and vigor will return. All druggists have Dr. Williams' Pink Pills at 50c, the full-size package.
