CANADIAN NATIONAL RAILWAYS. A Great Agency of Public Service.

- The C. N. R. is one of the world's greatest transportation systems. Its length of track alone entitles it to that distinction, but its chief claim rests upon the nature and extent of the services it renders. While entering practically every important centre in Canada it also serves widely diversified and distant areas, and in very many instances is the sole agency providing railway facilities.
- The C. N. R. is a large direct employer of labour, and indirectly, by virtue of the nature of its freight and other services, also enters importantly and indispensably into the commercial and industrial activities of the Dominion . . . creating new wealth . . . distributing raw and manufactured goods . . . enabling more employment and wages to be provided.
- Notwithstanding the sparsely populated condition of much of the territory from which the C. N. R. obtains its freights of grains, minerals, forest products, etc., its charges for haulage are very low . . . Canadian railway freight rates are probably the lowest in the world. On an average the C. N. R. receives less than one cent for hauling a ton of freight one mile.

Of every dollar of revenue received the C. N. R. pays more than one half to its employees as wages, and it purchases every year many millions of dollars worth of Canadian made or produced materials. The C. N. R. also pays in the course of a year over six million dollars in various taxes.

These facts, although thus briefly stated, are of tremendous importance to Canada and Canadians. They are here presented in the hope that greater patronage will follow a wider appreciation of the part this great railway system is performing in the commerce and development of the Dominion . . . and of its vast potentialities for future service. Standing as we are at the beginning of an upward swing in business generally, renewed and enlarged opportunities to use transportation facilities present themselves. The C. N. R. is ready and anxious to serve . . . efficiently and economically. Its departments embrace passenger and freight transportation, express, telegraphs, steamships and hotels.
