Every grocer sells it Send 10e for "Canada's Prize Recipes" 200 practical, home-tested recipes. EDWARDSBURG THE CANADA STARCH CO.,

It's interesting to know when reading the Daily News that the people of the whole district are doing the same.

The C.N.R. is an Important Factor in CANADIAN MINING.

Mining is by no means a new industry in Canada, but when its future development is considered in the light of recent discoveries it may quite rightly be said to be only in its infancy. Much of the success which has attended mining in Canada is attributable to the fact that the railroad facilities of the C. N. R. were easily available. In the same way its future is linked with the extent and nature of the transportation services at its disposal.

Coal formed the largest single item in weight carried by the C. N. R. in 1934. In that year the system hauled as revenue bearing freight, over 8,000,000 tons. Were it possible to collect this vast amount in freight cars and make one long train, it would extend almost half way across the continent. The importance of this commodity to the factories and homes of Canada needs no stressing . . . but it is well to bear in mind that the railroad is the only land transportation medium for coal haulage where distance is a factor.

Of course other mine products enter into the freight business of the C. N. R. Altogether, over 12,000,000 tons of mine products, embracing coal, coke, ores, sand, stone, gravel, oil, salt, etc., were carried in 1934, this being a substantial increase - 22% - over the preceding year.

The mining of metals has of recent years assumed greater dimensions than before, and it may be of interest to note that of non-ferrous metals in semi-refined state, the C. N. R. carried over two hundred thousand tons in 1934, which was more than twice the quantity carried in 1933.

In many districts of Canada the C. N. R. is providing the sole railroad service available to this great industry, and its tracks enter, or are close to, some of the most promising mining areas in the Dominion. In accordance with its policy of rendering the greatest possible public service the C. N. R. is co-operating to the fullest in furthering the development of these areas.

In all these branches of railroad and allied activities the C. N. R. maintains a high standard of efficiency. Its passenger trains are speedy and comfortable... fares are low and there are many special excursions at reduced rates. Its freight, express and telegraph services are quick, reliable and economical and its hotels and camps, situated throughout Canada, offer the traveller, whether on business or pleasure, accommodation of the highest standards. You are invited to make a greater use of these C. N. R. facilities.

> During the present Summer season the C. N. R. is providing special fares and excursions between points throughout Canada. These are exceptional travel bargains. The nearest C. N. R. Agent will be glad to give full particulars.
