The money to pay the retiring home in the south. allowance would be taken from the national credit account..

At the same time as the above plan is put into operation arrangements would be made with a social credit engineer to institute the price discount plan in order to prevent inflation of prices.

It is claimed by the originators of this scheme that the country budget would be balanced and the periodic busi and son, who have been spending ness panics would be prevented. Space in a daily newspaper possesses a power that is lacking in the lineage of other advertising media.

It is not only more economical . . . which is a matter of easy computation . . . it is not only more flexible, it is not only more timely and rapid, but also it is the advertiser's unfailing point of contact with the mass market and every spot market of the Dominion of Canada.

The Daily Newspaper possesses a power by means of which an advertiser, who knows how to use it, can reach and move to action all or any part of the Canadian consuming public.

In this North American continent there was spent during 1934 in the columns of the daily newspapers more than \$500,000,000. The strongest of all supplementary media was used to the extent of \$114,000,000. Why?

Because for prompt action on sales plans . . . for quick consumer influence at minimum cost . . . for willing co-operation from the retail trade, the daily newspaper is today, as it always has been, the outstanding and

most economical basic advertising medium.
