CONSTRUCTION TO START EITHER AT DRY DOCK OR SEAL COVE AS SOON AS PRELIMINARY DETAILS CAN BE FINALLY WORKED OUT—WILL TAKE 18 MONTHS TO BUILD.

Arrangements For Marketing Entire Output Already Made

PLENTY OF WATER IS AVAILABLE AT SHAWATLANS LAKE—POWER WILL BE TAKEN FROM LOCAL COMPANY WITH POSSIBLE AUGMENTATION BY CONCERN'S OWN PRODUCTION.

Officials of the Mutual Pulp and Paper Mills of Prince Rupert Limited from Vancouver, San Francisco and Wisconsin Rapids, Wis., made announcement today that it had been definitely decided, following thorough investigation, to build a 250-ton bleached sulphite pulp mill at Prince Rupert either on the dry dock site or at Seal Cove.

As soon as the necessary details can be worked out, construction will start. The cost of the plant will be some \$5,000,000 and the permanent payroll is conservatively estimated at two thousand men including those who will be engaged in logging in the woods.

The period of construction, largely in steel and concrete, will be about eighteen months.

Logging operations will be commenced well in advance of the completion of construction. The concern controls four and a half billion feet of titled timber on the Queen Charlotte Islands and on the Skeena River.

Engineers of the company are at present here to make further investigations.

There is plenty of water available at Shawatlans Lake.

Power will be taken from the Northern B. C. Power Co. augmented by what the company may produce itself.

Arrangements have already been completed for marketing the entire output of the plant by rail and waterborne in Eastern Canada and the interior of the United States.

Announcement of these facts was authorized today by all five visiting principals of the concern—F. L. Buckley of Vancouver; E. A. Thompson, J. L. Stewart and Geoffrey Winslow of San Francisco, and L. A. DeGuere of Wisconsin Rapids, Wis. A luncheon was tendered them this afternoon by the council of the Prince Rupert Chamber of Commerce and they will be leaving this evening on the Prince Rupert for Vancouver.

Thousand Perish in Floods

With ruin upstream inestimable, with bodies and wreckage already sweeping by on the swollen waters of "China's twin sorrows"—the Yangtze and Yellow rivers—Hankow, the commercial centre of central China, one of the world's wealthiest cities, prepares for the worst flood in history. Soldiers and coolies are working on the dykes, which may break at any moment, inundating the city. The crest of the flood has not reached the town yet, and heavy rains indicate a losing battle for the toilers on the levees. Literally thousands have been killed by the raging waters. This photograph, showing a large portion of the city under water, was made in the 1932 flood.

Reconstruction Party Is Flatly Opposed to Transportation Merger

Announces Three-Fold Program in Effort to Unravel Problem—Would Insist on Efficient Running of Two Lines and Complete Refinancing of C. N. R.

TORONTO, July 27: (CP)—Fearing that a railway merger would lead ultimately to transportation control "in the hands of a few financiers" with Parliament powerless against a "transportation trust," headquarters of Hon. H. H. Stevens' Reconstruction Party last night announced a three-fold program which would seek to unravel the Canadian railway problem.

"There is only one solution," said the statement, "and that is to create in Canada sufficient business which, in itself, creates traffic in goods and passengers."

Aiding this, said the statement, would be insistence upon efficient running of the two railways.

The statement also urged a "writing down of the value of assets of the Canadian National in accordance with recommendations of a competent board of railway appraisers to be appointed and absorbing into the national debt of the Dominion this outstanding debt over and above a reasonable percentage of new value of the Canadian National."

MAKE ENDEAVORS TO PLACATE MUSSOLINI

LONDON, July 27:—While European statesmen were continuing eleventh hour efforts to get Premier Benito Mussolini of Italy to accept broad economic concessions instead of military conquest of Ethiopia, fears were entertained that Il Duce would stop at nothing less than a protective tribute which to many would be "unthinkable."
