NATIONAL EMPLOYMENT

The House of Commons has adopted the principle of the bill appointing a National Employment Commission which will handle all relief in co-operation with the provinces and municipalities, one of the duties of which will be to investigate and report upon proposals for the carrying out of programs of public works and other projects to aid in providing employment. Another will be to recommend to the minister comprehensive measures constituting a long range plan of national development.

The bill passed its second reading at the week-end and is now being considered in detail with the probability of Huskies Lose In its passing with few alterations. The sum of \$50,000,000 is being allocated for the purpose of enabling the commission to carry out its work unhampered by financial restrictions.

The scheme is an ambitious one and should result in giving employment to a great many people now on relief.
