ONTARIO LIBERALS TRY A CHANGE OF LEADERS

HAVE CITY BAND FOR RUPERT

Live Effort on Foot to Organise a Proper Brass and Reed Instrument Band of Musicians to Form Regular Prince Rupert's Own Band.

Determined to organise if possible this winter a city band, a number of the players of band instruments both brass and reed, got together the other evening and discussed the proposition. As a result of enquiry it is found that there are already over a score of residents of Prince Rupert who not only can play band instruments, but who are willing to join the city band, and are working now to have the band organised. It is considered by many residents of Prince Rupert rather a reproach to the city that the band music at public open air gatherings on Dominion holidays should have to be supplied by Indians when the more educated white residents might so easily have a band of their own. The excellence of the Indian bands available is only the more pointedly a hint to Prince Rupert's white population to have a city band and not let the Indians show them the way.

Many local business men have promised financial support if the band is not going this winter, and the fund for the supply of instruments if once started will rapidly grow. The idea is to have the city furnish a substantial nucleus subscription, when the business men will help out, and the bands men you may be certain will play up.

Meanwhile all interested especially those who can play band instruments might kindly communicate with William Godson at the Provincial Government Building.

FATAL TENDENCY

Cards, Women, and Race Track Wreck Fine Career

Chatham, Ont., Nov. 1.—With an international reputation as an accountant and mathematician, and having established a system of bookkeeping in Sing Sing prison still in existence there, and after having come to Canada to start life over again and rising from menial employment to that of expert accountant in the Bent Goods company, Richard R. Canning fell again when he forged \$2,000 in checks. He blames cards, fascinating women and the race track for downfall. He was sent to prison for seven years.

CHINESE ROYAL FAMILY SAID TO HAVE FLED

(Canadian Press Despatch)

Pekin, Nov. 1.—Fighting between the rebels and the Imperialists continues, the former making a determined resistance. Late advices indicate that Hankow was not re-taken by the Imperialists although the railway station was captured.

The people have little faith in the promises of a constitution made by the throne being carried out. A des-

patch to the Chinese in San Francisco states that the Emperor has fled from Peking and his whereabouts are unknown. Hundreds were killed on both sides in Sunday's fighting. Churches, offices and storerooms are being utilized by the Red Cross Society.

N. W. ROWELL TO LEAD THE ONTARIO LIBERALS

(Canadian Press Despatch)

Toronto, Nov. 1.—Following the resignation of Hon. A. G. McKay at the meeting of the Ontario Reform Association yesterday Mr. N. W. Rowell, K. C., a well known Toronto lawyer, was offered and accepted the leadership of the Ontario Liberals in the Legislature.

A platform will be drafted tomorrow. Prohibition will be one of the planks. Hon. Mackenzie King was chosen president of the association.

POWER OF PRAYER

Blind Man Prays and His Sight is Restored

Lapeer, Mich., Nov. 1.—While lying in bed at his home and praying that he might once again see the light of day Harmon Nix, a Lapeer resident who for the past four weeks has been hopelessly blind from an apoplectic stroke, opened his eyes to find that he was no longer blind. He says that the restoration of his eyesight was due to prayer, as the physicians had told him he would never see again.

A GREAT STRIKE OF ANTHRACITE COAL IS MADE

ROYAL WEDDING

Archduke of Austria Weds Princess Zita of Parma—Bride Most Beautiful Woman.

Vienna, Nov. 1.—In the presence of Emperor Franz Joseph, the Archduke Earl Franz Josef, heir to the throne of

THE ARCHDUKE OF AUSTRIA

Austria, and the Princess Zita, of Parma, one of the most beautiful women of Europe, were married the other day. The king of Saxony and other members of the royal family were present.

The bridegroom is a nephew of Archduke Franz Ferdinand, heir presumptive to the throne who renounced all rights of succession because his marriage was morganatic.

Area Seventy Miles by Thirty at the Head of the Naas, Skeena and Stikine Rivers is a Great Bed of the Finest Anthracite Coal Seams, Unbroken by Volcanic Rocks---Great Find by Mr. R. Campbell Johnstone

DECLARED GREATEST COAL FIELD IN AMERICA

The Coal is Hard, Smokeless Carbon, Showing 84 Per Cent. Burning Quality—Rivals the Quality of Welsh and Pennsylvania Coals—Five Railroads Will be Used to Develop the District—Stewart is the Nearest Port of Shipment, But Prince Rupert Will Benefit by Shipments Via Hazelton—Company Will Build Bunker Ports on Coast

Round about the headwaters of the Skeena, the Naas, the Stikine, and the Klappan rivers is situated a coal field seventy miles long by thirty miles wide, containing wide deep, rich seams of fine anthracite non-coking and smokeless coal the coal most suitable of all for naval purposes, for the mercantile, marine and for domestic use in cities. The seams of this huge coal field are unbroken by volcanic rock, laid in the most perfect geological formation for cheap mining known to mining engineers as "Synclines" which give frequent out-croppings and make the seams easy of access for working without need for deep shaft-sinking. Th analysis of the coal is between 84 and 85 per cent fixed carbon giving from 6 to 8 per cent of ash.

Second to None in America

The magnificent coal field is known by its discoverer R. Campbell Johnstone, the best known mining engineer in Northern British Columbia to be second to none ever yet discovered on the American continent and in fact, the only coal field in the world equal to the Pennsylvania coal fields and the British Welsh coal country from which the coal supplies of the navies of the world are today supplied.

Great Commercial Location

From its position the new coal field can command and control the whole coal market of the Pacific Ocean including the markets of the Orient where the Hankow and Japanese coal is soft and smoky unsuitable for naval use. The marvellously cheap mining possible owing to the formation will place this coal in a position to compete to good purpose with both the Welsh and Pennsylvania coal.

Will Build a Railway

Means of communication with the coal fields are at present lacking, but the Mackenzie & Mann short line for Stewart to the interior is one of the quickest means of development at present under construction. Stewart and the Portland Canal form the nearest means of easy access, but five railways are completing charter arrangements into that district—one of them being R. Campbell Johnstone's own concern. He himself went into the district from Hazelton to the Ground Hog Mountain, two hundred miles beyond, with a big pack train. His wife and son accompanied him on one of the most extensive, interesting, and arduous journeys ever

LOCAL LONGSHOREMEN DECLARE A STRIKE

Notice of Reduction of Wage Scale from Fifty to Forty Cents an Hour Precipitates a Conflict—May be Trouble When the Prince Rupert Arrives Today

As a result of the action of the Grand Trunk Pacific, and Pacific Coast Stevedoring Company's posting a notice reducing the wages paid longshoremen on the wharf here from 50 cent per hour to 40 cents, the men are said to have struck.

W. Dinny, secretary of the Longshoremen's Union here, a branch of the I. L. A., positively refused this morning to make any definite statement to the News of the men's attitude or demands, not even admitting that there is any strike. "All I can say is that the notice posted at the wharf covers the situation," he said. The notice simply announces that after the first of November the wages paid longshoremen by the G. T. P. and Pacific Coast Stevedoring Company will be 40 cents per hour.

From Mr. A. E. McMaster confirmation was obtained of a wharfside rumor that the longshoremen are demanding 50 cents per hour for general freight handling, 60 cents an hour for handling coal either by day or by night, and 75 cents per hour for overtime and Sunday work. W. Dinny did not contradict, or affirm this.

BIG POTATOES FROM DIGBY

Mr. A. W. McLean Demonstrates That Giant Tubers Can be Produced There.

Just to satisfy himself whether or no good potatoes could be grown on Digby Island, Mr. A. W. McLean who is assisting Engineer Jennings in the supervision of the Marine Depot, in his spare time this summer planted a few potatoes outside his shack. In due course the plants appeared. They grew to the ordinary size of potato plants, but refused to stop there. Like the beanstalk in the fable they kept on growing. Not until they were as high as a man's head did those plants quit growing. The fear was freely expressed that the plants had run all to top, and that no tubers would be found at the roots.

Yesterday, Mr. McLean dug up his plants. What he saw so surprised him that in order to save himself from the charge of exaggeration he sent some of the potatoes to the News office as proof. The potatoes were big enough to match the plants. Scarcely one was less than six inches long, and some of them touched close to eight inches. Fine, full bodied, thin skinned and dry,

Oh, You Montreal!

Montreal, Oct. 31.—(Special)—Smallpox has broken out here again

TO ABOLISH STRIKE METHOD

British Strike Commission of Investigation Reports Propounding a New Industrial Plan.

London, Eng., Oct. 31.—(Special)—The report of the commissioners who recently enquired into the working of the Railway Conciliation Board has been issued. The Commission recommends the adoption of a new scheme to be operative until November 6, 1914, by which all questions affecting hours, wages and condition of service are not to be settled by negotiation but referred to the Conciliation Board.

The Commissioners think that with their great responsibilities the companies cannot and should not be expected to permit any intervention between them and the men on the subject of discipline and management.

CATTLE TRAIN COLLISION

Fifty Steers Killed at Winnipeg. Stockman Injured

(Canadian Press Despatch)

Winnipeg, Oct. 31.—Thomas Chapman, stockman, Medicine Hat, and several others were seriously injured when a C. P. R. stock train was telescoped by a freight train near here. Fifty cattle were killed.

CITY HALL TONIGHT

Principal Subjects for Council Discussion According to the Mayor This Morning.

"Tonight the city council will meet to discuss and perhaps settle the waterworks clearing contract," says the Mayor. "The other principal item of discussion is the appointment of the waterworks engineer which will probably be made."

ACTOR WAS VERY UNWELL

And Members of the May Roberts Company Were Much Upset by Occurrence.

It is a well accepted truism that the conscientious actor or speaker or preacher knows no critic so severe as himself. This morning several members of the May Roberts Company were very much perturbed lest their performance of "La Belle Russe" last night might have been considered as below their standard of acting. Some indeed used harder words.

In fairness to the public and to the company alike, they wished it understood that the play which is one of the best the company presents fell last night much below their standard. The explanation is made that one of the actors cast for an important part, arrived at the theatre in a rather unwell condition. Not wishing to disappoint the audience, they decided to go on, but the mental anxiety of the situation, preyed on the minds of the company and prevented the play from being as convincing as was desired.

The company have always prided themselves on their good faith in presenting their very best to the public, and wish the public to be assured that no accidents will mar the performance for tonight and for the remainder of their engagement.

MONTREAL CHURCH BURNED

Church of St. Irene is Total Loss—Building was Valued at \$90,000

(Canadian Press Despatch)

Montreal, Nov. 1.—The Church of St. Irene, a Roman Catholic church, was totally destroyed by fire this afternoon. The loss is \$90,000.

TURKS HOPE TO RECAPTURE TRIPOLI

(Canadian Press Despatch)

Trieste, Nov. 1.—Italy has seized and occupied the Turkish islands of Rhodes and Lesbos according to Milan despatches. This is part of a naval demonstration threatened against Turkey in retaliation for Turkey's recent Tripoli successes.

The action is viewed with alarm in Trieste, as it is known to be offensive to Austria, and may be followed by a demand for explanations by the Austrian government.

Washington, D. C.—Officials of the Turkish Embassy look for the re-capture of Tripoli in the light of the advices received from Constantinople. The Turks have taken more forts and been shelling the town. The Italian losses are said to be enormous while that of the Turks is light by comparison.

BLAMED FR. VAUGHAN FOR LIBERAL DEFEAT

(Canadian Press Despatch)

Montreal, Nov. 1.—Hon. Rudolphe Lemieux speaking before the St. Louis Liberal Club last night, said it was prejudice not reason that won the day for the Conservatives and gave them an overwhelming majority in Ontario. The presence of Sir Wilfrid Laurier at the Eucharistic Congress, he said, had done much to cause religious antagonism, but he attributed the Ontario vote in a large measure to the indiscreet, unwise, and impudent sermons of Father Vaughan, whose arraignment of protestantism as a soulless religion had been peculiarly ill-timed.

THE RICHEST BABY

But a Few Days Old and She is Worth \$30,000,000

New York Nov. 1.—The richest infant in the world is the daughter of Mr. and Mrs. Anthony Drexel, Jr., born at the end of October at 1015 Fifth avenue. With her inheritances from the Gould and Drexel estates, it is estimated she will have at least \$30,000,000. This is the first grandchild born to the George J. Goulds.

CREOSOTED TIES FOR THE C. N. R.

G. T. P. is Not Likely to Require Them for Several Years Yet Says Gen. Supt. Mehan, but C. N. R. Erects Plant to Make Them.

While General Superintendent Mehan does not believe that creosoted ties will be needed on the G. T. P. for some years yet, a creosoting plant for the treating of ties for the Canadian Northern Railway is being established at Fort Francis by a Scottish firm. It is the intention of the company to have all their ties creosoted in future in order to prolong their life. It is also probable that experiments will be made with creosoted poplar ties owing the growing scarcity and consequently increased cost of harder wood now used.

Sir William Mackenzie has been considering the adoption of poplar sleepers hand as had tests with creosote treatment under observation.

Railway men have been growing quite concerned about this matter of tie supply. Year by year ties are becoming more costly and something will have to be done before the price becomes prohibitive. A great fortune awaits the man who will find a substitute combining cheapness and durability for the present wooden ties the supply of which will not last many more years at the present rate of consumption.

ONCE TOO OFTEN

B. C. Electric Railway Employee Cut to Pieces in Fog

(Canadian Press Despatch)

New Westminster, Oct. 31.—While walking on the track of the B. C. Electric railway at Cloverdale, Philip McDonald, an employee of the company, was overtaken in the fog by a car and cut to pieces.
