DAILY EDITION.

THURSDAY, Nov. 2

A philosopher has pointed out the reason why a buzz of anger comes from those insect creatures that love the dark, when a rude hand rolls away the stone that hides them, and lets in the light. The psychology of the insect is the psychology of the hnman animal under similar circumstances. A great thinker once applied it to a branch the human race in a very biting sentence.

THE ATTACK ON THE "NEWS"

For these reasons, the attack of Alderman Hilditch and the Mayor on the News was a matter of no surprise. A newspaper that lets in the light is the last thing in newspapers they want. A lickspittle soporific sheet plentifully fattened by pap from the civic purse, chanting hired praises to the aldermen would suit them better. The News prefers, however, to espouse the interest of the citizens.

Alderman Hilditch and the Mayor are very much alarmed lest Colonel Davis may feel hurt over any criticism he may receive. But there is no word of sympathy for the thirty-nine gangs of men who packed their grub up through the bush to Woodworth Lake, who spent the days in measuring up the timber and at nights riskeed the perils of sleeping out in the open, on a fool's errand.

Colonel Davis is a professional man and is in receipt of a goo salary for the part he played in the comedy of "Letting the Contracts by Competitive Tender." Colonel Davis is a professional man, and knows perfectly well the impropriety of acquainting himself with the bids of the contractors and station gangs before putting in his own bid. If Colonel Davis while in receipt of a salary paid by the citizens, is willing to put professional usage behind his back and join in with Alderman Hilditch and the Mayor in their petty political schemes, Colonel Davis need not expect to find protection by lurking behind his professional position

The proof that Alderman Hilditch and the Mayor intended to fool the station gangs is seen in the statement made by the Mayor last night in reference to the clearing contracts

And as for the City Engineer's estimate the citizens do not forget vive the ordeal, but thereby fit themthat the City Engineer's estimate for the retaining walls done by to be labor was \$8,000.

DIRECTIONS FOR COOKING A HARE: FIRST:-"CATCH YOUR HARE'

To produce good printing you must "first catch your

good printer. . . You can't get good printing from a poor printer, even if he work with never so good an equipment. If he lacks the "knack," the trained taste, the single-minded fondness for his work which real printers have, he will do poor printing for you. If he has all of these, and in addition to them adequate modern equipment, your printing will have distinction, salesmanship, the lure of type-beauty.

As this office produces good printing you may infer the presence of a good printer-who is 'catchable.'

CHAPTER IV.

THE VOICE OF THE REEF

There comes a time in the life of every thinking man or woman when the argosy of existence, floating placidly on a smooth and lazy stream, gathers unto itself speed, rushes boils furiously over resisting rocks, and ultimately, if not submerged in an unknown sea, finds itself again meandering through new plains of wider

Such a perilious passage can never be foreseen. The rapids may begin shelter. It was bitterly cold. where the trees are highest and the meadows most luxuriant. No worning is given. The increased pace of events is pleasant and exhilarating as well and be comfortable." Even the last wild plunge over the cascade is neither resented nor fear ed. Some frail craft are shattered in transit, some wholly sunken, some themselves to painless death against emerge with riven sails and tarnished it, was very welcome. Moreover, embellishments. A few not only surselves for more daring exploits, more soul-stirring adventures.
