SOVIET PROGRESS

Sir Frederick G. Banting K.B.E., co-discoverer of insulin, paid a visit to Russia recently and, as a result of what he sa wand heard there, he writes very enthusiastically about the progress being made in that country in an article in "Canadian Business," just published. He says that scientific research and the application of science to faulted). industry and agriculture is the most impressive activity in the Soviet Union. There is no country in the world that is progressing so rapidly in this regard.

He quotes an array of figures, supplied doubtless by Soviet officials, to show the remarkable progress made in many phases of activity. Speaking of education he says that in 1931 over nineteen million adult people learned to read and write. At present every child must attend school until 15 years of age. The difficulty of the task can be understood when it is stated that children are taught in 70 different national languages.

Showing the application of science to agriculture, Sir Frederick points out that there was a shortage of pure bred stock. In order to make up for that, artificial fertilization was carried out with cattle and sheep so that the Aces increase of high bred stock was tremendous. In order not Five Clams to overdo the production of wheat much of the wheat land in the southern part of the country is being planted with citrus fruits, tea and tobacco. There has to be some export Max Baer Takes in order to secure foreign credits and that has led to the increase in production of gold. It is expected that the output this year will amount to \$500,000,000 and much of this Former World's Heavyweight Box- Stiles is being used in paying off foreign debts and securing ing Champion Resumes Training credits to enable them to buy things they do not yet pro-

In concluding an interesting article, the writer says: former world's heavyweight boxing "The Soviet Government is building a gigantic structure champion, has gone into training on the solid rock of science and research. For this reason for what is believed to be a comethere now remains not a vestige of doubt as to the future astrous defeats of last year at the success of the Soviet Union. Her future is doubly secure hands of Jimmy Braddock. because no people in the world so fully realize that the whom he lost the title, and Joe science of today is the research of yesterday and the re- Louis. search of today is the science of tomorrow."

While Sir Frederick seems to see most unscientifically Old Country Soccer only one side of the picture, it should be an inspiration to other countries, including Canada, to keep up-to-date in the matter of industry and agriculture. What Russia can do Canada might also do. We feel strongly that the huge 1. vacant areas in Canada should be filled with people who may be expected to become good Canadian citizens but to City 2. do this it will be necessary for the state to see that they get the proper start and that markets are provided in the early stages of settlement. These lands are one of our chief o natural resources but they are valueless as they are today. They are even a danger. It is for the government of the country to see that they are utilized in such a way as to prove of lasting benefit to Canada as a nation.

LECTURE

Good Crowd Out to Hear Dr. Mandy-Rocks of Earth's Crust Subject For Tonight

Before a good crowd of listeners Thursday night in the city council chamber, Dr. Joseph T. Mandy, resident mining engineer, in the seond of his series of lectures for prospectors and others interested Sea Hawks Defeat Calgary To Lead Two Leagues in Action Last Night; n mining, went into the principles Commercial and Five Pins of mineralogy including physical properties that can be used by prospectors in the field for idenification of minerals.

Such physical properties included 'ustre, color, cleavage, fractures, specific gravity, structure, crystal form, oder, etc. Demonstrations were made with actual specimens of minerals.

Dr. Mandy went on to discuss he subject of geology applied to prospecting including work of agencies that modify the earth's surface such as wind, frost, changes W. D. L. F. A. P. ning two to one over Old Empress n temperature, oxidation, rainfall, 15 4 12 95 100 32 while Lambie & Stone won by a treams, seas and lakes, glaciation, waters, volcanoes, organic life, etc. Tonight Dr. Mandy will discuss

ocks which compose the crust of earth and their association with nineral deposits.

COUGHS and COLDS Call for Dr. Mustard!

Head colds, sneezing, coughs, grippy aches and pains - all call for Dr. Mustard - either in a full-length hot mustard bath, a mustard foot-bath. or, in the case of chest coughs, a mustard plaster. There is nothing better than the old-fashioned way of sweating out the poisons. It drives out the infectious germs and so stops coughs and

colds spreading through the family. Keep Colman's handy to stop that infectious cold at the very first sniffle or sneeze!
