A very methodical Scotsman staying at an hotel used to read 20 pages of his book every day, recording his progress by a marker. A wag put the marker back 20 pages every night. At the end of a week they asked the reader how he liked his book. He replied, "It's a verra interesting book but there's a ceran amount of repitition in it."

Judging from the magazines and newspapers, the whole of North America must be mad about cooking. There are recipes in every edition of most newspapers and all weekly and monthly journals and every milling company, baking powder concern, and cereal manufacturer issues recipes by the bushel. Think of the poor husbands who have to put up with the use of a different recipe at every meal.

Jake remarks that he does not look as if they fed upon recipes.
