#### HAVING IDEAS

It is usually dangerous to have ideas about anything. night. Young Houston even had No Funds to Continue Officer in King, the memory of Lord Nelson Particularly this is true in public life. The men who are the audicity to make high average, devoid of any pretence of original thought are often the of 177 for the night. Kewpie Tayones who rule the world. It does not pay to be ahead of lor said he should be chased home the multitude.

When a subject has been suggested and thoroughly | warrants are out for the arrest in Calgary has discontinued the and there was community singing explored by the advance guard of civilization, some man of the C.N. 5-Pin team. Yes, they services of its inspector. around town who has been elected to a school board or stole a march on the Pioneer Launother public body suddenly realizes that the idea is a good dry. one, seizes it as his own and popularizes it. Gradually from this point it seeps into the consciousness of the mass very fine apple. Has that any conof people. The thinkers are too radical for the average nection with "Red" MacIntosh as person to follow. Changes usually take place slowly and a 5-Pin trundler? new ideas must have time to permeate the average understanding.

#### WITHDRAWAL FROM SPAIN

The British government is making a big effort to though really it was a series of bad have outside European powers withdraw from Spain and "breaks." Italy has agreed to co-operate. That is a step in the right direction. Italy is one of the countries aiding the insurgents without officially taking part in the war. Germany know there will be a lot of fun unis also aiding the insurgents and it is claimed by these til they get used to that black line countries that Russia and France are aiding the Spanish because at least half of the ladies loyalists. There are also some British soldiers fighting in go over it every shot. Adopting the that country including a regiment of Canadians who are helping the loyalists defend their own country.

#### NEW WAR IDEAS

It is difficult these days to know when a country is at and one loss. war and when it is not. Officially Japan is not yet at war smithy came searing into my with China. Russian troops are said to be aiding China \_\_\_\_\_ but officially Russia is taking no part in the conflict. So in Spain several countries are involved yet there is no outside country at war with Spain. A few years ago if British soldiers or British citizens had been killed or attacked there would have had to be a quick apology or British warships would heve been despatched to demand reparations. Today Britain is fearful of starting a world war which may have calamitous results, not only to Britain but to every other country involved. A world war today may lead to anything and probably it would be fatal to our present civilization.
