WHAT OF THE FUTURE?

Today many people are much concerned about the LOG SCALE future. They fear there is going to be a great war in which practically the whole world will be destroyed. Some also fear a great contest between the workers and the employers. Others expect the war to be between the Third Highest in History-Only dictatorships and the democratic countries. Everywhere there are people who are worried over the future. Some have savings and there is no safe place to keep them. A feeling of insecurity pervades the world.

While we must all admit there is uncertainty as to what year 1936 was the third highest will happen in the future, worrying will not help much. on record, it is announced. It Many of the things people are expecting will not happen was but ten percent below the and things that do happen will turn out differently boom year of 1929. from what we expect. That has been true in the past and will be true again. The best we can do is to carry on, doing the best we can in our respective spheres, knowing that there is an intelligence greater than ours working things out in the best way possible. The difficulty is that we lack perspective. We cannot see the whole show or 6c to 11.9c and 6c. we would know it is only part of what is to be a finished picture.

The world has many things to learn and one is to be more tolerent of the views and actions of others. We all 6c. think we are right but we may be wrong or, at any rate, others may be more nearly right than ourselves.

MAY LEARN LESSONS

Even though we cannot tell what may happen in the near future and, although nothing more terrible can happen than may happen to any person crossing a street or driving on the highway, yet we can all learn lessons from current history and rearrange our views to meet present conditions. All the most sublime theories in existence cannot work without the education and training of the individual in citizenship. The most perfect League of Nations cannot work as long as we have Hitlers and Mussolinis and other dictators or bureaucrats who refuse to co-operate or as long as we have a subservient population willing to be herded by ruthless men. People must learn tolerance, balance, consideration of others, and all the other Christian virtues before they can expect to be selfgoverning. They must learn to analyze and thus be able to separate the false from the true. Opportunities for the gratification of intensly selfish yearnings after wealth and power must be taken away so that men may exert independent judgments whether it be in Italy, Russia, Germany, Japan or even in the province of Alberta.

As a nation we must learn that under present conditions the weak are apt to be subjugated by the strong and that unity of nationalities and of classes is essential

to success.

Mine Looks Very Good To Killas

James Killas Makes Trip Into Property Which He Has Held For Three Years But Only Seen This Year

"If my property does not make a mine, there will be no mines in British Columbia," declared James STENOGRAPHERS (MALE AND Killas of the Commodore Cafe who returned last week from the Chilcotin country where he had been making his first inspection of the property in which he is interested in that district. He gets to it by way of Williams Lake on the Pacific Great Eastern Railway and then drives something like eighty miles by stage and fifteen miles on horse-

it for three years. Two men have been working on the property all summer and more than two for the past few weeks. A number of mining men have CHRISTMAS Card agents make heard about it and have been in there to look at it but none so far Philadelphia, 41-5; Brooklyn, have mentioned a cash payment that suits Mr. Killas. He feels sure he has a real mine and is not giving it away.

back. He has been doing work on

Speaking of the Chilcotin country Mr. Killas says there is an abundance of game, fine scenery and plenty of trout in the lakes and streams.
