DAILY EDITION.

FRIDAY, DEC.

AFTER THE FIRE, WHAT?

A nasty fire visited Prince Rupert on Monday. It was not serious enough to be in the calamity class, and, being Government property, the loss is spread over the whole Province. But it was nasty enough to show everybody what might easily be the fate of the whole of Prince Rupert if a fire were to get out of hand some windy day.

The fire came as a warning to the city that our water sup- Pub. Sept. 11, 1911. C. E. BAINTER, Locator 1836 ply is of no use to fight a fire of any consequence. There is another danger that so far few have noticed. Had the fire happened during a period of hard and continuous frost or in a period of drought, the city would have exhausted its supply of drinking water. Drinking water in our present condition is far too valuable to expend on quenching fires.

If work cannot be rushed on the Acropolis Reservoir, then measures should be taken to instal a good pump on a float near the wharf and lay a system of fire mains in the business section, to be supplied with salt water.

Dawson for a long time depended solely on such a system, even in winter time when the Yukon was low, and a hole | Skeens Land District - District of Queen Charlotte in the ice had to be made to feed the pump. By keeping small head of steam always in the boiler, and with an ample supply of coal oil and cordwood for use the moment the alarm sounded, an emergency was always provided for.

The possible result of a conflagration is important enough to warrant a meeting of business men and other citizens to take steps to ensure that some adequate system of fire pro- commencement. tection is installed at the earliest moment.

ABOUT THAT ADVERTISING CONTRACT.

In fairness to the City Council and t othe City Clerk, and despite Alderman Newton's chivalrous efforts on our behalf at the Chief Commissioner of Lands and Works for a Wednesday night's Council meeting, The News fully under- licence to prospect for coal, oil and petroleum on and under the following described lands on the West stood that the assessment schedules could be published singly | Coast of Graham Island: stood that the assessment schedules could be published singly if desired. We were under no misconception in the matter.

We are not given to complaining about injustices done to 80 chains, thence west 80 chains to point of comourselves, but the ground of complaint that The News has in regard to the assessment schedule advertising is that it was Located August 1st, 1911. awarded to a dummy paper that had neither circulation nor existence. In the case of one schedule The News' price was as low as The Journal, but the contract was awarded the Journal.

The value of advertising, as is well known, depends upon the extent of bona fide circulation. This is as true in adver- coal and petroleum on and under 640 acres of land on Graham Island described as follows: tising assessment schedules as in advertising clothing or real estate.

On the other hand, The News was not looking for a square deal, so it is not undergoing any disappointment in the matter.

FIRST: "CATCH YOUR PRINTER"

최정화장장 DIRECTIONS FOR COOKING A HARE:

FIRST:--"CATCH YOUR HARE"

To produce good printing you must "first catch your good printer. . . You can't get good printing from a poor printer, even if he work with never so good an equipment. If he lacks the "knack," the trained taste, the single-minded fondness for his work which real printers have, he will do poor printing for you. If he has all of these, and in addition to them adequate modern equipment, your printing will have distinction, salesmanship, the lure of type-beauty.

As this office produces good printing you may infer the presence of a good printer—who is 'catchable.'
