CANADA'S TRADE WITH THE WORLD

In the last calendar year Canada had a foreign trade amounting to \$1,663,093,000, an increase of 19.7%, as compared with an average of 8.1% for 24 leading countries. In this exchange the Dominion had a favourable balance (including exportation of gold as a commodity) of \$393,000,000. Another feature of international trade was the tourist business, incoming and outgoing, totalling \$355,568,000, the balance in Canada's favour being \$155,958,000.

With the figures for tourist trade added to those for ordinary commerce, our international trade rose to \$2,018,661,000, with a total balance in Canada's favour of more than half a billion dollars.

Banking plays a vital part in the upbuilding of the foreign trade of Canada, and foreign trade is the backbone of the native industries which are the foundation of Canada's economic structure.

In providing financial service for this enormous trade a leading part is played by the Bank of Montreal, which, with its 500 branches throughout Canada, its own offices in financial centres abroad, and its own banking correspondents throughout the world, carries through promptly and smoothly the task of financing the movements of an infinite variety of commodities.

The Bank's services include: Loans to importers and ex: porters; purchases of bills of exchange representing exports; providing commercial credits for purchases abroad; purchase and sale of exchange "futures" for protection against price fluctuation in foreign currencies; special wire facilities with the important exchange markets to speed transactions; reports of character and standing of foreign firms; commercial accounts; foreign currency accounts; safekeeping of securities.
