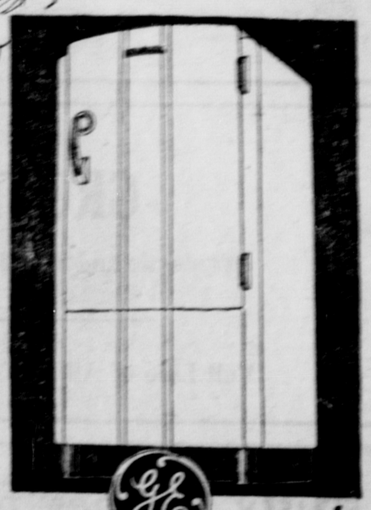
GUARD BABY'S HEALTH WITH A G-E REFRIGERATOR



The only safe way to preserve food is in a temperature *always below 50°*. Harmful bacteria multiply rapidly above 50° and you can't always tell by the look of food or even the smell or taste when it is fit to eat. With a G-E Refrigerator you KNOW that baby's food is safe — and you save money, too, on food bills and operating cost. Easy terms make it easy to own one.
