Bernice Palmer says

Radio is staging a revival all its drama-but it is here alright. real old-fashioned revival! The revival of two little words that have been almost lost in the hurry and scurry of modern civilization! Two little words that are as old as the hills and as new as latest streamlined cars—as up-to-date as a skyscraper and as old-fashioned as a corn cob pipe! None other than those two little words which, in themselves, constitute a complete sentence and mean so much -

Have you noticed how that little sentence of just two words seems tala this afternoon going through to have been relegated to the things of the past? It is a long time since we have heard it in every day usage and yet, without fully realizing just what it was that was missing! from polite conversation, we have missed it just the same. That is what makes this revival so effective now.

In our craze for speed and brevity we have cut even the little sentence, "Thank You" to a minimum and the result is not pleasant. We just cannot believe that "Thanks" means as much as an old-fashioned "Thank You". Once in a while it may be alright but not as a steady diet. It is like comparing "yes!" with "uh-hu."

And the beautiful thing about this revival is the painless way in which it is being carried out. There! ciety's paper, the "Cypress," the is no sermon to suffer and no collection at the end. In fact, it is generally introduced with a laugh. But then, any "Thank You" has, that effect or it at least produces a smile. Even if it is a sad "Thank, You," it still produces a feeling of; pleasure in both parties concerned. It is such a nice little sentence no one can say it and not feel its beneficent influence and no one can receive it without a corresponding feeling of pleasure.

When two little words can cover so much ground, why relegate them to the realm of forgotten things? Silly, I'd say! Goodness knows we have plenty of other words in our vocabulary that could be deleted without loss to anyone and others cord in the course of time because they have lost their power to put ever their original meaning. Some words are like that but not "Thank You." These two words mean the votional period by Wilfrid Hicks. It same thing today as they always have.
