LIVER BILE-

And You'll Jump Out of Bed in the

Morning Rarin' to go The liver should pour out two pounds of figuid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk. A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pille to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile how freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by

name! Stubbornly refuse anything else. 25c.
