* It was a freak accident which * Pointing to the present of the society bring all possible TIMBER IS

* wrecked Britain's fastest * price of wheat as compared with pressure to bear upon the public bodies to induce them to take up this matter.

"What happens in the mind of a judge when he goes out to view the gardens?" inquired Professor Buck. He sees on the score card that 25 marks are to be given for design and layout. Design is a very real thing. It demands an artistic tempermanent. The landscape art has been defined as the art of improving land for human use and enjoy- ing over the week-end in the Cowing agreement between Canada and ment in order to produce a maximum of utility and a maximum of beauty." Some of the gardens Prof. Buck saw here fell down in not having produced a maximum of utility. Paths should be where paths were needed.
