PRICE OF SILVER

The price of silver is too low for steady production in most of the silver mines of the country. If the price were increased they could operate. The suggestion is that the Miss Marion Keefe was elected by Dominion government should purchase the silver at 65c a fair majority to succeed Miss an ounce, the same metal that is today being sold at about

We are strongly in favor of the bonus on silver as at Midnight. long as production bonuses are being paid on other produets such as wheat. We also think there should be a bonus on fish production in order that fishermen may make a profit.

As a matter of general policy we do not see any Beta of these schemes as being permanently practicable. We cannot see the end if it continues. All we suggest is that, if the bonus is paid on wheat, it should be paid on all other primary products. It is our opinion that the country cannot continue to pay these bonuses because it will not have enough money unless taxes are levied on these same farmers, miners and fishermen to pay for the bonuses and that sounds ridiculous.

But it is just possible that some of us are out of date in our ideas and that there will be found a way of handling the situation when every producer begins to demand the bonus. Possibly a dictator will be necessary to make it possible to get back to bedrock once more.

ALSO BORROWING

Then again we come to the question of borrowing. Nearly everybody is borrowing and will continue to do so as long as anybody is willing to lend. After that it is possible that there may be forced loans until all the surplus is used up. By that time we may have discovered that nobody ever had real intention of returning the money they borrowed. Countries borrow to the limit. So do provinces or states and cities borrow until they find they can no longer pay the interest and they ask for an easement. It is a curious condition.

POPULAR MEASURE

So popular was the Canadian-American trade pact in the House of Commons that the opposition did not take a division on it. When the speaker asked for "ayes and nays" no one challenged the decision and asked for a recorded vote. Evidently opposition members did not want it known how they voted or they would have asked for a record.

CANADIAN RAILWAYS

As a result of the campaign being waged by President Sir E. W. Beatty of the Canadian Pacific Railway and others, people are gradually learning something about the railways of the country and particularly about their own railways, the Canadian National system.

One of the most interesting statistical tables published shows that, while in Great Britain, there are 1991 people to the mile of railway and in France 1015, the United States 541. Argentina 518, there are in Canada only. 259 people to the mile, the only country with fewer than this being Australia with 236 people to the mile. This tells the story. The people of a country are the passengers and their activities provide the freight. Few people means little travel and little freight. If Canada had twice the population, she would have possibly twice the railway travel and require twice the amount of freight movement.
