MOSLEM OPINION

Evidently the invasion of Albania by Italy is proving somewhat of a boomerang to the Italians. The country is largely Moslem and the Moslems in Asia take great exception to the killing of people of their own faith in Albania and the deprivation of their liberty by the invaders. Anti-Italian demonstrations have taken place and the Mohammedan newspapers have been attacking that country. Prior to the move against Albania, Italy had been posing as protector of the Moslem world.

THE AIR BASE

Southern newspapers have all been carrying more or less full reports of an interview with Hon. Ian Mackenzie, minister of national defence, in which he told about the FOR SALE-Cheap. Cruiser "Bodefences of the coast. The part of the speech that dealt with Prince Rupert told of the spending of \$375,000 at the mouth of the Prince Rupert harbor and confirmed the previous understanding that the work on the seaplane base at Seal Cove would commence in June.

The spending of over half a million dollars in the neighborhood of Prince Rupert together with a follow-up? next year is bound to make business lively. Already a good many new faces are noticed in the city and more will be seen as the work here advances. The expenditure at Seal Cove is mostly for preparing the site and putting in the cement work. The erection of buildings will be part of the complete scheme but it is not yet announced whether any building will be erected this year.

CAN THEY BE TRUSTED?

There are still people who think the dictators of Europe may be trusted when they say they will respect the rights of other countries. They may be right and we hope they are but the mass of opinion here is that they can be trusted only so far as their interests are served. As long as the opposition to their advances is strong enough they will refrain from attacking. Evidently President Roosevelt is among those who believe nothing but a mailed fist is effective in restraining them.

NEW AND BETTER

For the Halibut and Salmon Fleets

Following the investigations of the Fisheries Research Station, the Company has just completed extensive changes and improvements in ice storage and ice delivery methods.

Ice for the boats will all be old ice, thoroughly cured or aged at new low temperatures. It will be delivered into the hold, even in the hottest weather, as cold as the storage room.

Fishermen are, invited to inspect the new system. Better ice than ever before, at no increase in cost, means economy to the boat and improved quality in fish delivery.
