### ABOLISH UNEMPLOYMENT

The feature of the representations made by representatives of the All Canadian Congress of Labor to the Dominion government prior to the present session of Parliament and now published in "The Canadian Unionist' was an attempt to bring pressure to bear on the government to have it take pontical action to abolish unemployment. They asked for a definite and clear-cut policy of employment and economic reconstruction. The following introductory paragraph gives the main idea of the argument:

"The rise of dictatorships in Europe and Asia, which menace the peace of the world, is due primarily to economic insecurity. No democracy can be established or maintained so long as unemployment and the poverty and privation which it entails are permitted to destroy both the faith and the hope of the people. And in Canada, a land of abundance, with its vast human and material and financial resources, the disparity between actual conditions and the possibilities which are obviously attainable is so great as to create serious and justifiable discontent and unrest. The people of Canada would willingly undergo sacrifice and privation if these were inevitable and necessary; they come of pioneer stock, and endured scarcity in the early days when they were forced to make homes for themselves in the wilderness. But that period for the vast majority of the people at least, has passed into history, and we believe that, if the leaders of industry and finance are unable to provide economic security for by default. Canadian citizens, they have a right to look to their governments for leadership and direction."

### THE WISMER SYSTEM
