## PRESIDENT OF CHINESE REPUBLIC A CHRISTIAN.

So much have things quieted down in Honan Province and, in fact, in the whole of the district given over to the Presbyterian Church that all the Presbyterian women missionaries have returned from Shanghai to their posts in the interior of China. Reports just received at the Presbyterian mission offices are of the most reassuring kind and indicate that so far as Honan and the adjacent province are concerned the troubles are over.

In view of the fact that the President of the new republic is a Christian and most of the leaders of the revolutionary party have either become Christians or are favorably inclined toward Christianity, the various missionary boards of America believe the time is ripe to Christianize China and have determined to make a special effort to Christianize her at this time; and in order to prevent overlapping and to more effectively deal with the problem, a general conference of all the mission boards of America having missionaries in China has been called for February 27th in New York.

Launches and Boats for Hire N.E. end of Wharf

GEORGE FRIZZELL'S MEAT MARKET.

Visitors to Prince Rupert who come by one boat and leave on the same are loud in their expressions of admiration of our broad avenues and sidewalks. It concretizes their preconceived opinion that this is a great city in the making. This they are not surprised at; but that so new a city should already have as fine stores as are to be found in much larger coast cities is a surprise. One of a group of men and women who arrived on the Prince Rupert, standing in front of Mr. Frizzell's store yesterday afternoon, observed: "Why, this is as fine and dainty as anything you will see in Vancouver."

## "WATER POWERS OF CANADA" FIRST INVENTORY ISSUED

CONSERVATION COMMISSION ISSUES REPORT ON CANADA'S WATER POWER RESOURCES—AN EXHAUSTIVE COMPENDIUM OF USEFUL INFORMATION WITH FINE MAPS.

"Katada River, 300 ft., head, 15,000 horse power. Proposed to develop 8,000 horse power for Prince Rupert," is a quotation from the new work "Water Powers of Canada," just issued by the Commission of Conservation. This large and interesting volume is the first report and inventory ever made of the water powers of the Dominion. It is illustrated throughout with photographs and contains much useful information, particularly in regard to the laws for staking water powers in the provinces. The investigation made by the commission, which has extended over a period of two years, shows that there are 1,016,521 horse power developed from water power in Canada. Every phase of the subject from the laws governing the disposition of water powers in the various provinces to the actual physical data regarding each individual water power concerning which information was obtainable is treated in the report.

A chapter is devoted to the water powers of each province in which the general features of the province as regards water power development are discussed and an outline given of the law whereby powers are granted or leased to private individuals or corporations. The larger developments are also described. The statistical data given in tabular form includes the height of the fall, the horse power that may be developed, the present development and the main uses to which the power is applied, such as lighting, pulp and paper making, etc. Reference is also made to the possibility of increasing the amount of power developed by storage reservoirs and dams where such are feasible.

The broad and optimistic statements very often made on the platform and in the press regarding our vast water power resources are deprecated. To quote from the report: "General statements implying that the aggregate amount of water power must be great because the total water area, or watershed area, is so great, or because there are so many lakes and rivers, are generalities to be considered of very little definite value. . . . One of the chief dangers of such generalities is to create in the popular mind a feeling of unwarranted assurance that, even though desirable water rights are being granted by a government, yet there is so much left that no apprehension may be entertained regarding the amount of power rights being parted with."

The volume embodies all the useful information regarding the water powers of Canada that has heretofore been collected and has been supplemented and, in many cases, verified, by field surveys, conducted by the engineers of the commission. In fact, all the information regarding the maritime provinces powers was obtained in this way last year by the experts of the commission. The data regarding the western provinces was found to be so incomplete that it was decided to make special investigations of the powers in those provinces, the results of which will be published next year in the form of a report on the "Water Powers of Western Canada." The engineers of the commission are now engaged upon this work.

## SERVIAN CABINET RESIGNS

"Black Hand" Conspiracy Discovers Which Demoralizes Govt.

(Special to Daily News.)

Belgrade, Servia, Feb. 14.—The Servian cabinet has resigned. The ministers took this step partly on account of the recent discovery of what is known as the "Black Hand" conspiracy in the army to force King Peter to dismiss his Radical cabinet or to abdicate in favor of the Crown Prince. Another reason given for the resignation is that the support afforded by Parliament to the government has declined considerably.

## Australian Government Curing Drink Habit Adopts Famous NEAL CURE

Sending Sunshine and Happiness Into Hundreds of Darkened Homes Instead of Inflicting Fines or Prison Cells Upon Her Unfortunate Citizens

The government of South Australia has set an example worthy of imitation by the other nations of the world. Owing to the extent, enormity and the awful consequences of the drink habit, they have for years past been investigating its cause, effect, treatment and possible cure.

In the year 1910 Rev. A. C. Rankine, commissioned by that government, visited the United States, and after a thorough investigation of drink habit treatments, returned to his government last September and gave a detailed and lengthy report recommending the adoption of the NEAL THREE-DAY DRINK HABIT CURE. The government of South Australia adopted his report, and established the cure in a large government sanatorium, where those addicted to the drink habit are treated at government expense, instead of being fined or sent to prison cells.

During the first ninety days 182 persons so affected were perfectly cured by the Neal treatment at government expense and restored to citizenship. In addition to this, reports show that more than double that number availed themselves of the Neal treatment in private sanatoriums in Australia.

Scientific research and investigation of the centuries has recently culminated in the establishment of the fact that the drink habit, so called, is caused by the poison of alcohol stored up in the system by the long continued or excessive use of alcoholic liquors, and that the man or woman thus afflicted is as much in need of and must have medical help as if suffering from typhoid fever or other serious ailment. Dr. Neal has solved this problem. He has not only demonstrated the above, but he has found the drug which antidotes this poison, and, combining same with other well known neutralizing and eliminating drugs, he has originated the Neal treatment, which, in thousands of cases, has perfected absolute and safe cures in the shortest space of time of only three days.

The Vancouver Neal Institute is one of the many that is carrying on this good work, and grateful patients every day attest to the efficiency of the Neal treatment.

If in need of help yourself or if you have a friend who is losing his life, write for booklet giving full information.
