Talk Is Now Increasing Of Settling By Peaceful Means Of Troublous Danzig Issue

ROME, August 15: (CP)—Italians outside the government said yesterday that Germany and Italy were agreeable to holding a conference with France and Great Britain for settlement of the German claim to Danzig.

A new plan is reported to embrace three points with settlement of Europe's other economic and colonial expansion problems as the ultimate aim, including Italian claims on France.

An extremely reliable Nazi source in Berlin said yesterday that Professor Carl V. Burckhardt, League of Nations commissioner for Danzig, who has been mentioned as a possible mediator between Germany and Poland, had a plan for a peaceful settlement of the Danzig question. The plan is said to call for a reunion of Danzig with the Reich and for a "direct and guaranteed connection between East Prussia, including Danzig, and Germany proper." Burckhardt has already met Chancellor Adolf Hitler and may go to London to confer with British Foreign Secretary Lord Halifax.

Prof. Burckhardt, in a statement today, said he had a "short conversation about internal Danzig questions" in Germany but he attached no particular significance to them as other sources had.

League of Nations sources at Geneva said today that the League was ready to abandon protection over Danzig if Poland approved such action as a step toward the solution of Poland's quarrel with Germany.

In Warsaw the Polish press and official circles indicated open distrust today for various rumored plans to save peace by a new form of compromise.
