THE STABILIZING INFLUENCE

In a world of chaos-of wars and rumors of impending events -the daily newspaper stands out as a permanent and stabilizing influence in every community in Canada. When rumor has spread throughout the country, fed upon the flame of mass curiosity, and always curving farther and farther from facts, it becomes a reassuring experience to read the true facts in your daily newspaper. Here, through vast newsgathering organizations directed by trained observers, you are able to read and digest ALL THE FACTS as they ACTUALLY HAPPENED! Rumor plays no part in the life of a good daily newspaper. Its far-flung sources of authentic information enable it to turn the spotlight of truth upon every important event, sifting rumor and fact and flashing the complete story to every daily newspaper reader. Your home will be enriched by a good daily newspaper—its stabilizing influence will reflect itself in a more tolerant outlook upon the world in which we live.

Advertising Regularly---

THE merchant who says he doesn't need to advertise, and advertise regularly, is confessing that he has nothing to offer customers.

Consistent advertising has been proven time and time again to be the best protection against a slump in sales.

It attracts people to your place of business.

You did not learn your multiplication tables in a day. They were learned by repetition and constant practice.

This is a peculiarity of the human mind. Details are only remembered by repetition.

The success of advertising lies in consistency and regularity.

Remember that newspaper advertising is the indelible kind of advertising.

BE WISE AND ADVERTISE.

NEW AND BETTER

For the Halibut and Salmon Fleets

Following the investigations of the Fisheries Research Station, the Company has just completed extensive changes and improvements in ice storage and ice delivery methods.

Ice for the boats will all be old ice, thoroughly cured or aged at new low temperatures. It will be delivered into the hold, even in the hottest weather, as cold as the storage room.

Fishermen are invited to inspect the new system. Better ice than ever before, at no increase in cost, means economy to the boat and improved quality in fish delivery.
