Member of Audit Bureau of Circulations

Yesterday the King and Queen ended a wonderful visit to Canada. For a whole month they were in the full hard on the eyes. glare of the public and, during that time, they showed themselves to be wonderfully fitted for the exalted positions they hold. Here is what the Canadian Unionist, organ of the All-Canadian Congress of Labor, has to say

"Many—perhaps the great majority of Canadians— during the years so that many of ands. There is no desire of the British people to fight Japan as long as our rights are respected. If war does take place it will be only because there is no other way of protecting British interests and British citizens.

USE THE ELEVATOR

The use of the elevator during the coming crop year is one of the important matters to engage the efforts of the Chamber of Commerce and citizens generally. Now that a subsidy has been granted, even though for only a limited number of sailings, it should help the situation and make it ession for more commonly to operate the elevator successfully. During recent years it has been used only as a storehouse to be filled once a year.

COST OF LIVING

Some speak of the high cost of living in Prince Rupert because, as an instance, strawberries have been so expensive. In reply it may be pointed out that strawberries were expensive only because people demanded them out of season. The berries were brought in from the United States and were subject to freight and duty. Now that the British Columbia crop is available they are sold at a reasonable price. People have to pay high prices for out of season goods and that makes the cost of living high. If they were content, as our fathers were, to wait for the proper season, the cost would not be high.
