HALIBUT FISHING PROBLEM

The closing of the halibut fishing season on July 29 this year as announced by the international fisheries com- Krause kicked clear. Eby blocked Krause did well to save twice on Velvet was just about value for mission, draws attention once more to the difficulties un- Vink's hard drive and Morgan his knees. Davies stopped Camer- the win. Morgan got more to do der which the halibut fishermen labor in connection with saved on his knees from Baker. on and Krause saved twice the regulations now in force. One of the reliable halibut and Cameron headed past, Morgan Teams: vessel owners states that the average catch of the industry saved on the line from Cameron. this year so far has netted \$500 per man and that, if they are lucky, there is a possibility of making another hundred dollars before July 29. This does not give the men! enough to live on much longer than during the fishing season and, as there is little other employment to be found in the district, they feel themselves badly handicapped.

Under somewhat similar circumstances the wheat growers of the prairies, also dependant on one crop a year, appeald to the government for a bonus in the form of a guaranteed price and got it. The fishermen here are not any better off than the wheat growers on the prairies. Some of them have moved to Vancouver in the hope of getting more winter employment than they could get in Prince Rupert. We have not yet heard if they have bettered their condition. It seems that some of them are worse off than before. At any rate the condition is ser-1 ious and is worthy of the careful consideration of those who take an interest in the future welfare of Prince Ru-

Many of the fishermen blame the halibut commission! for the position in which they are placed. In opposition to this it has been pointed out that, had there been no halibut commission, there would have been no halibut to catch by now. The fishing banks would have been depleted. Yet it is the present situation we have to face and try to make the most of it as it is, not as it might have been. If the regulations can be changed in such a way as to improve the condition of the Prince Rupert and Alaska fishermen. an effort should be made to secure those changes. It would be most unwise for us to sit idly by and allow the business to disappear so far as this city is concerned.

It has been suggested that the Canadian fishing boats might be bonussed to the extent of one cent a pound, the handicap they suffer at present in competition with American boats.

Thrilling Game

sixth inning that they managed to polis meeting Seal Cove. The game was one of thrills and than Krause and did it well. Eby was his usual reliable self, coming through with the ball many time.. Donnie Nenlson showed up very well both in kicking and judgment.. Davies added another goal and tackled well. Keays also was good and McLeod gave a good display. McLeod is a real prospect as he is prepared to take advice too.. Bryant wasted few chances and his centres were dangerous thrisuson played his usual fast hard game and Smith, at centre, was always dangerous. Armstrong played well and feeds the other forwards effectively. McMeekin was a constant source of danger. Krause did well and, with a little more determination, might develop into a really good goalie. "Moose" Gomez played a "whale" of a game. He is not so wild as he was. Parsons was very effective. Veitch put up a strong game and and Darow Gomez wer very valuable wing halves. Darrow put a lot of pep into the forward line when he went to centre. Baker gave a good display and is improving. Dickens was clever and played hard most of the time. Cameron is still timid at times but his speed is a great asset. Ferguson tries hard but seems to find the

real help to the team. The quality of play and the sportsmanship warrant a much larger attendance. If the players can get "up the hill" and play for an hour and a half surely sports lovers might make the grade too.

forward line unsuitable to his

style. Vink keeps trying and is a

NEW AND BETTER

For the Halibut and Samon Fleets

Following the investigations of the Fisheries Research Station, the Company has just completed extensive changes and improvements in ice storage and ice delivery methods.

Ice for the boats will all be old ice, thoroughly cured or aged at new low temperatures. It will be delivered into the hold, even in the hottest weather, as cold as the storage room.

Fishermen are invited to inspect the new system. Better ice than ever before, at no increase in cost, means economy to the boat and improved quality in fish delivery.
