NEW AND BETTER

COLD CURED ICE

For the Halibut and Samon Fleets

Following the investigations of the Fisheries Research Station the Company has just completed extensive changes and improve ments in ice storage and ice delivery methods.

Ice for the boats will all be old ice, thoroughly cured or aged at new low temperatures. It will be delivered into the hold, even in the hottest weather, as cold as the storage room.

Fishermen are invited to inspect the new system. Better ice than ever before, at no increase in cost, means economy to the boat and improved quality in fish delivery.
